UL
PUCCH
UL (PUCCH) slot
K1=1 for PDSCH1 counting
UE is configured with K1={1 to 6}, i.e. PUCCH is supported in both UL slots within a DL slot.
For a HARQ codebook on a PUCCH in the 1st UL slot within a DL slot duration: K1' = {1, 3, 5}.
For a HARQ codebook on a PUCCH in the 2nd UL slot within a DL slot duration: K1' = {2, 4, 6}.
