Subject: Nomination of Candidate for 3GPP TSG-CT WG1 Vice Chairman

TO: The ETSI Mobile Competence Center (3GPP Secretariat)

Samsung is pleased to nominate Mr. Chen-Ho Chin as a candidate for a Vice Chairman of the 3GPP TSG-CT WG1. Mr. Chin belongs to Samsung Electronics, representing Samsung as a member of ETSI, and has been leading Samsung's delegation in the 3GPP TSG-CT WG1 since 2005.

Samsung is fully committed to support Mr. Chin in his task as a Vice Chairman. Attached is a brief biography of Mr. Chin.

Best Regards

Byungduck Cho

Executive Vice President
Telecommunication R&D Center
Samsung Electronics, Co., Ltd.

Curriculum Vitae of Chen-Ho Chin

Chen-Ho has over 27 years working experience in telecommunications. He graduated with honours from Liverpool University, United Kingdom in 1979. After graduation he worked on fixed telecommunications systems and for over 10 years participated in design and development of fixed digital switching, being deeply involved amongst the then new generation of digital and ISDN switching development.

Chen-Ho moved to mobile telecommunication systems and GSM in particular in 1990 and in 1998 started involving himself in GPRS. His work in mobile telecommunications since 1990 has covered Standardisation, System Engineering, Design and Development, Integration and Testing.

Since 2000 Chen-Ho has been working in UMTS. In the years of 1996 to 2000, Chen-Ho has in parallel been working on mobile satellite telecommunication systems. In all these times, areas of work and the different systems, Chen-Ho has worked on both the terminal side and the network side gaining a good perspective of and contributing to both sides of what makes a mobile system.

In the arena of 3GPP standardisation, Chen-Ho has a long record of being an active progressive participant in the CT1 working group (and before it the CN1 working group) actively supporting and contributing to progress the work in 3GPP.

With his many years of experience, wide ranging telecommunications background in different engineering areas and knowledge of various mobile and fixed telecommunications systems and standards, Chen-Ho can contribute richly to the continuing standardisation activities of 3GPP.
