ITU-T recently established an Identity Management (IdM) Focus Group. The first of a series of meetings was held in Geneva from 13 -16 February 2007. The objective of the Focus Group is to facilitate the development of a generic Identity Management framework, by fostering participation of all telecommunications and ICT experts on Identity Management. The FG IdM is open to ITU Member States, Sector Members and Associates as well as any individual from a country which is a member of ITU willing to contribute to the work; this includes individuals who are also members or representatives of interested Standards Development Organizations.

Attached is the report from the first meeting of the FG for your review and comment. Key members from the IdM community attended this February 2007 meeting and we encourage members of your organization to participate in the next meeting which will be held in Geneva, 23-25 April 2007.
