Re: 3GPP2 SC M2M Numbering AdHoc Response to LS on Study Item on Alternatives for E.164 for Machine Type Communications

Dear Mr. Jones:

The 3GPP2 SC M2M Numbering AdHoc has received your correspondence dated 27 August 2010 regarding “LS on Study Item on Alternatives for E.164 for Machine Type Communications”. We plan to review the attached SP-100198 Work Item Description for the Feasibility Study on Alternatives for E.164 numbers for Machine Type Communications and to contact you with questions or comments under separate cover as required.

Please note the following:

- Regarding your request to keep you informed regarding our progress, we will comply with that request.
- For any future correspondences to this AdHoc, please e-mail them to m2mchair@3gpp2.org to ensure proper receipt and processing. We did not receive the referenced correspondence from you directly.
- The AdHoc will attempt to identify any unique requirements that 3GPP2 may have. However, we do not intend to “reinvent the wheel” so we will welcome timely information regarding 3GPP progress on this and related topics as committed in your correspondence. We look forward to receiving your Technical Report, even in draft format, when available. In addition, we are also open to discussing interoperability and interworking issues that may arise.

Please feel free to contact us if you have any additional questions or comments you may have.

Sincerely,

David Crowe

David Crowe
