Title:	LS on "I3.05 – Node B O&M Functional Description"

SA5 thanks RAN3 for their LS in R3-99803 regarding "I3.05 – Node B O&M Functional Description".

SA5 reviewed the version v0.2.1 of I3.05. There was general agreement that the document was a useful aid in understanding how the message desciptions are derived. Because of this, SA5 would like to encourage RAN3 to transform it from a RAN3 internal report to a 3GPP report in order to increase it's visibility.
