Reason for change: ⌘	Figure 3 incorrectly uses the abbreviation "SP". Section 3.2, and figure 3 require the consistent usage of Sprof.
Summary of change: ⌘	Amend "SP" references in figure 3 to "Sprof", and add the "Sprof" abbreviation into clause 3.2
Consequences if not approved: ⌘	Ambiguity regarding the meaning of abbreviations in Fig 3.

How to create CRs using this form:

Comprehensive information and tips about how to create CRs can be found at http://www.3gpp.org/specs/CR.htm. Below is a brief summary:

1) Fill out the above form. The symbols above marked ⌘ contain pop-up help information about the field that they are closest to.

2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be downloaded from the 3GPP server under ftp://ftp.3gpp.org/specs/ For the latest version, look for the directory name with the latest date e.g. 2001-03 contains the specifications resulting from the March 2001 TSG meetings.

3) With "track changes" disabled, paste the entire CR form (use CTRL-A to select it) into the specification just in front of the clause containing the first piece of changed text. Delete those parts of the specification which are not relevant to the change request.

KEEP the History box of the TS to be changed (see end of the present document)
