Toon Norp, KPN N.V. (toon.norp@tno.nl)
3GPP SA1 Chair

Dear Toon:

ATIS is hosting a group comprised of members and representatives of 3GPP Organizational Partners (for LTE), TIA (for P25), and TCCA (for (TErrestrial Trunked Radio (TETRA)) to progress the LMR (Land Mobile Radio) and LTE (Long Term Evolution) systems interworking ("LMR/LTE Interoperability AHG"). The group developed the enclosed document, designated LMRLTE-00021R007.docx, which provides an organized list of common nomenclature used in the North American LMR community, the TETRA community, and the 3GPP Mission Critical Push To Talk (MCPTT) standards, and identifies correspondences and differences between the three sets of terms.

On behalf of the LMR/LTE Interoperability AHG, ATIS is providing this terminology document to SA1 for its information and review, and would welcome any comments, questions, or input.

I appreciate your support for this material, and please contact me if you require any additional information.

Best regards,

Steve Barclay
ATIS, Director, Global Standards Development
