ISO/IEC JTC 1/SC 29/WG 03 MPEG Systems would like to follow up on our initial response in WG03 N1090 to your liaison letter on Messaging Application Format (PROMISE) ([S4-231437](#)).

During MPEG#145, an online meeting held in January 2024, the work on the project referred to as "Messaging Media Application Format (MeMAF)" has further progressed and stabilized. MPEG is interested in coordination with 3GPP to address your requirements and timelines.

The following output documents regarding this project have been produced:

- WG02N0350 Draft Requirements for a Media Application Format addressing Messaging Services
- WG03N1163 Working Draft of Messaging Media Application Format (MeMAF)

In addition, MPEG Systems has added a mandate related to this project to the AHG on Application Formats. The AHG is planning to have multiple conference calls and a face-to-face meeting to discuss this project. Please find the detailed information about this plan in Annex A.

We invite you to provide your views and comments on the above MeMAF documents, as well as the timeline in relationship to your standard development schedule.

Our WG meeting schedule can be found at <https://www.mpeg.org/meetings/>.
