**Title: WMF Application for MRP Status in 3GPP**

**Agenda item: 7**

**Document for:**

Decision	X
Discussion	
Information	

The attached email gives the application received from WMF which is seeking MRP Status in 3GPP.

This application has been processed by correspondence on to PCG email list but the matter was not concluded.

WMF has been invited to this meeting in order to give an explanation of the work that it does and to seek a conclusion of the Partners in respect of their application.

Subject: WMF application for MRP status in 3GPP

Dear Colleagues,

I sent you an application received from the Wireless Multimedia Forum (WMF) some time again and many of you have now responded.

The general opinion is in favour of accepting the application from WMF but some questions have been raised that are not so easily resolved by email.

It is not clear to all of our Partners what input should be expected from WMF and some further questions raised on the role of MRPs in general.

In view of these open issues I propose to defer the matter to our next OP meeting. If this is acceptable then I would also propose to invite WMF to make a presentation at the OP meeting in order that we can learn more about their work and be able to decide on their application.

I will accept your silence as agreement! If Partners do not raise an objection by 9 March then I will assume that we proceed in this way.

Best regards  
Adrian
