Title: Liaison to TSG-RAN to Request Adjustment to the Terms of Reference
Document for: -

TSG-RAN-WG3 have been progressing the work relating to the O&M aspects of the Iub interface. As a result of this, a refined architecture has been adopted for Node B management which introduces a number of new terms. In accordance with this, TSG-RAN-WG3 have identified an inconsistency between the current terms of reference for TSG-RAN and the terminology used within the specifications.

TSG-RAN-WG3 would respectfully request that TSG-RAN amend the terms of reference to ensure consistency with the specifications, as detailed below.

The proposed change is as follows:

"Transport of the Implementation Specific O&M between OMC-B and Node B"

To be replaced by:

"Transport of the Implementation Specific O&M between the [Management System](#) and Node B"
