

## CHANGE REQUEST

⌘ **25.331 CR 1369** ⌘ rev **-** ⌘ Current version: **3.9.0** ⌘  
 Spec Title: **Radio Resource Control (RRC);** ⌘

For **HELP** on using this form, see bottom of this page or look at the pop-up text over the ⌘ symbols.

**Proposed change affects:** ⌘ (U)SIM  ME/UE  Radio Access Network  Core Network

<b>Title:</b>	⌘ Support of UP measurement reporting in CELL_PCH/URA_PCH		
<b>Source:</b>	⌘ Nortel Networks, Qualcomm, CPS, Ericsson		
<b>Work item code:</b>	⌘ <span style="float: right;"><b>Date:</b> ⌘ 5<sup>th</sup> March 2002</span>		
<b>Category:</b>	<table style="width: 100%; border: none;"> <tr> <td style="width: 50%; vertical-align: top;">                     ⌘ <b>F</b>                      Use <u>one</u> of the following categories:  <b>F</b> (correction)  <b>A</b> (corresponds to a correction in an earlier release)  <b>B</b> (addition of feature),  <b>C</b> (functional modification of feature)  <b>D</b> (editorial modification)                      Detailed explanations of the above categories can be found in 3GPP TR 21.900.                 </td> <td style="width: 50%; vertical-align: top;"> <b>Release:</b> ⌘ R99                      Use <u>one</u> of the following releases:                      2 (GSM Phase 2)                      R96 (Release 1996)                      R97 (Release 1997)                      R98 (Release 1998)                      R99 (Release 1999)                      REL-4 (Release 4)                      REL-5 (Release 5)                 </td> </tr> </table>	⌘ <b>F</b> Use <u>one</u> of the following categories: <b>F</b> (correction) <b>A</b> (corresponds to a correction in an earlier release) <b>B</b> (addition of feature), <b>C</b> (functional modification of feature) <b>D</b> (editorial modification) Detailed explanations of the above categories can be found in 3GPP TR 21.900.	<b>Release:</b> ⌘ R99 Use <u>one</u> of the following releases: 2 (GSM Phase 2) R96 (Release 1996) R97 (Release 1997) R98 (Release 1998) R99 (Release 1999) REL-4 (Release 4) REL-5 (Release 5)
⌘ <b>F</b> Use <u>one</u> of the following categories: <b>F</b> (correction) <b>A</b> (corresponds to a correction in an earlier release) <b>B</b> (addition of feature), <b>C</b> (functional modification of feature) <b>D</b> (editorial modification) Detailed explanations of the above categories can be found in 3GPP TR 21.900.	<b>Release:</b> ⌘ R99 Use <u>one</u> of the following releases: 2 (GSM Phase 2) R96 (Release 1996) R97 (Release 1997) R98 (Release 1998) R99 (Release 1999) REL-4 (Release 4) REL-5 (Release 5)		

<b>Reason for change:</b>	⌘ In R99 the measurement performance requirements for UP measurements in CELL_PCH/URA_PCH are missing from RAN4 specifications.  With the current signalling it is possible to configure the measurement interval for UP event triggered measurement reporting at values which are too small in CELL_PCH/URA_PCH which may lead to unnecessary battery consumption. The same case applies also for periodical reporting.
<b>Summary of change:</b>	⌘ UE positioning reporting in CELL_PCH and URA_PCH is made an UE capability. If the UE supports this capability it will comply to the measurement performance requirements that will be defined in Release 5 RAN4 specifications.  For UEs in CELL_PCH/URA_PCH the measurement interval for event triggered measurement reporting is specified to be at least 64 seconds in order to save battery life of the UE.  For UEs in CELL_PCH/URA_PCH the measurement reporting interval for periodical reporting is specified to be at least 64 seconds in order to save battery life of the UE.  <b>Isolated impact analysis:</b> Impacted function is UE Positioning reporting in CELL_PCH and URA_PCH states. The proposed changes are isolated impact to this functionality. If the UE does not implement this CR then UTRAN has no means to know if the UE supports this capability and therefore UTRAN can not rely on the UP reporting in these states.
<b>Consequences if</b>	⌘ UP measurement reporting in CELL_PCH, URA_PCH is misaligned between

<b>not approved:</b>	RAN2 and RAN4 specifications in R99.		
<b>Clauses affected:</b>	⌘	8.4.1.6.7, 10.3.3.45, 11.2, 11.5	
<b>Other specs affected:</b>	⌘	<input checked="" type="checkbox"/> Other core specifications	⌘ 25.306
		<input type="checkbox"/> Test specifications	
		<input type="checkbox"/> O&M Specifications	
<b>Other comments:</b>	⌘		

**How to create CRs using this form:**

Comprehensive information and tips about how to create CRs can be found at: [http://www.3gpp.org/3G\\_Specs/CRs.htm](http://www.3gpp.org/3G_Specs/CRs.htm). Below is a brief summary:

- 1) Fill out the above form. The symbols above marked ⌘ contain pop-up help information about the field that they are closest to.
- 2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be downloaded from the 3GPP server under <ftp://ftp.3gpp.org/specs/> For the latest version, look for the directory name with the latest date e.g. 2001-03 contains the specifications resulting from the March 2001 TSG meetings.
- 3) With "track changes" disabled, paste the entire CR form (use CTRL-A to select it) into the specification just in front of the clause containing the first piece of changed text. Delete those parts of the specification which are not relevant to the change request.

### 8.4.1.6 Measurements after transition from CELL\_DCH to CELL\_FACH/CELL\_PCH/URA\_PCH state

The UE shall apply the following rules for different measurement types after transiting from CELL\_DCH to CELL\_FACH/CELL\_PCH/URA\_PCH state:

< . . . >

#### 8.4.1.6.7 UE positioning measurement

~~NOTE 1: Whether support for UE positioning measurement in CELL\_PCH and URA\_PCH states is mandatory or optional in Release 99 is FFS and pending ongoing work in TSG-RAN-WG2 and TSG-RAN-WG4.~~

~~NOTE 2: The applicability of UE positioning measurements in CELL\_PCH, URA\_PCH and CELL\_FACH needs to be aligned in all relevant specifications.~~

Upon transition from CELL\_DCH to CELL\_PCH or URA\_PCH, the UE shall

- if the UE does not support UP measurement **reporting validity** in CELL\_PCH and URA\_PCH states as indicated in the IE "UE positioning capability" included in the IE "UE Radio Access Capability":
- stop UE positioning measurement reporting.

Upon transition from CELL\_DCH to CELL\_FACH, or upon transition from CELL\_DCH to CELL\_PCH or URA\_PCH and if the UE supports UP measurement **reporting validity** in CELL\_PCH and URA\_PCH states as indicated in the IE "UE positioning capability" included in the IE "UE Radio Access Capability", Upon transition from CELL\_DCH to CELL\_FACH or CELL\_PCH or URA\_PCH state, the UE shall:

- retrieve each set of measurement control information of measurement type "UE positioning" stored in the variable MEASUREMENT\_IDENTITY; and
- if the optional IE "measurement validity" for this measurement has not been included:
  - delete the measurement associated with the variable MEASUREMENT\_IDENTITY.
- if the IE "measurement validity" for the measurement has been included, and the IE "UE state" has been assigned to value "CELL\_DCH":
  - stop measurement reporting;
  - store the measurement associated with the variable MEASUREMENT\_IDENTITY to be used after the next transition to CELL\_DCH state.
- if the IE "measurement validity" for the measurement has been included, and the IE "UE state" has been assigned to value "all states":
  - upon transition from CELL\_DCH to CELL\_PCH or URA\_PCH:
    - if the choice in the IE "Reporting Criteria" included the IE "UE Positioning" stored in the variable MEASUREMENT\_IDENTITY is set to "UE positioning reporting criteria" and the value of the IE "Measurement interval" included in this IE is less than 4664 seconds:
      - consider the value of the IE "Measurement interval" as being 4664 seconds;
    - if the choice in the IE "Reporting Criteria" included the IE "UE Positioning" stored in the variable MEASUREMENT\_IDENTITY is set to "Periodical Reporting Criteria" and the value of the IE "Reporting interval" included in this IE is less than 4664 seconds:
      - consider the value of the IE "Reporting Interval" as being 4664 seconds
  - continue measurement reporting according to its UP measurement reporting capability;
- if the IE "measurement validity" has been included and the IE "UE state" has been assigned to value "all states except CELL\_DCH":

- upon transition from CELL\_DCH to CELL\_PCH or URA\_PCH:
  - if the choice in the IE "Reporting Criteria" included the IE "UE Positioning" stored in the variable MEASUREMENT\_IDENTITY is set to "UE positioning reporting criteria" and the value of the IE "Measurement interval" included in this IE is less than 4664 seconds:
    - consider the value of the IE "Measurement interval" as being 4664 seconds;
  - if the choice in the IE "Reporting Criteria" included the IE "UE Positioning" stored in the variable MEASUREMENT\_IDENTITY is set to "Periodical Reporting Criteria" and the value of the IE "Reporting interval" included in this IE is less than 4664 seconds:
    - consider the value of the IE "Reporting Interval" as being 4664 seconds
- resume this measurement and associated reporting according to its UP measurement reporting capability;
- if the transition is due to a reconfiguration message which included the IE "Primary CPICH info" (for FDD) or "Primary CCPCH info" (for TDD), and the UE selects a cell other than that indicated by this IE; or
- if the transition is due to a reconfiguration message which does not include the IE "Primary CPICH info" (for FDD) or "Primary CCPCH info" (for TDD); or
- if the transition is not due to a reconfiguration message:
  - delete the assistance data included in the variable UE\_POSITIONING\_OTDOA\_DATA\_UE\_BASED, UE\_POSITIONING\_OTDOA\_DATA\_UE\_ASSISTED and UE\_POSITIONING\_GPS\_DATA.
- if the IE "Positioning Methods" stored in the variable MEASUREMENT\_IDENTITY is set to "OTDOA" or "OTDOA or GPS":
  - if the IE "Method type" stored in the variable MEASUREMENT\_IDENTITY is set to "UE-based" or "UE assisted preferred but UE-based allowed" or "UE-based preferred but UE-assisted allowed":
    - begin monitoring assistance data received in System Information Block type 15.4 and System Information Block type 15.5 according to subclause 8.1.1.6.15.
  - if the IE "Method type" stored in the variable MEASUREMENT\_IDENTITY is set to "UE-assisted":
    - begin monitoring assistance data received in System Information Block type 15.4 according to subclause 8.1.1.6.15.
- if the UE is in CELL\_FACH state:
  - if the IE "UE positioning OTDOA neighbour cell list for UE assisted" stored in the variable UE\_POSITIONING\_OTDOA\_DATA\_UE\_ASSISTED or UE\_POSITIONING\_OTDOA\_DATA\_UE\_BASED contains neighbour cells on other frequencies than the current frequency:
    - perform measurements on other frequencies according to the IE "FACH measurement occasion info".

The UE may:

- if the IE "Positioning Methods" stored in the variable MEASUREMENT\_IDENTITY is set to "GPS" or "OTDOA or GPS":
  - begin monitoring assistance data received in System Information Block type 15 and/or System Information Block type 15.1 and/or System Information Block type 15.2 and/or System Information Block type 15.3 according to subclause 8.1.1.6.15.

## 10.3.3.45 UE positioning capability

Information Element/Group name	Need	Multi	Type and reference	Semantics description
Standalone location method(s) supported	MP		Boolean	Defines if a UE can measure its location by some means unrelated to UTRAN TRUE means supported
UE based OTDOA supported	MP		Boolean	TRUE means supported
Network Assisted GPS support	MP		Enumerated ('Network based', 'UE based', 'Both', 'None')	Defines if the UE supports network based or UE based GPS methods.
Support for GPS timing of cell frames measurement	MP		Boolean	Defines if a UE has the capability to perform the UE GPS timing of cell frames measurement [7]. TRUE means capable
Support for IPDL	MP		Boolean	Defines if a UE has the capability to use IPDL to enhance its 'SFN-SFN observed time difference –type 2' measurement. TRUE means supported
Support for Rx-Tx time difference type2 measurement	MP		Boolean	TRUE means supported
Support for UP measurement <u>reporting validity</u> in CELL_PCH and URA_PCH states	MD		Enumerated (true)	<u>Absence of this element means not supported and presence means supported.</u> <u>Note 1.</u>

NOTE 1: The performance requirements for this capability are defined in Release 5.

## 11.2 PDU definitions

```

--*****
--
-- TABULAR: The message type and integrity check info are not
-- visible in this module as they are defined in the class module.
-- Also, all FDD/TDD specific choices have the FDD option first
-- and TDD second, just for consistency.

## CHANGE REQUEST

⌘ **25.331 CR 1370** ⌘ rev **-** ⌘ Current version: **4.3.0** ⌘  
**Spec Title: Radio Resource Control (RRC);** ⌘

For **HELP** on using this form, see bottom of this page or look at the pop-up text over the ⌘ symbols.

**Proposed change affects:** ⌘ (U)SIM  ME/UE  Radio Access Network  Core Network

<b>Title:</b>	⌘ Support of UP measurement reporting in CELL_PCH/URA_PCH		
<b>Source:</b>	⌘ Nortel Networks, Qualcomm, CPS, Ericsson		
<b>Work item code:</b>	⌘	<b>Date:</b>	⌘ 5 <sup>th</sup> March 2002
<b>Category:</b>	⌘ <b>A</b>	<b>Release:</b>	⌘ REL-4
	Use <u>one</u> of the following categories: <b>F</b> (correction) <b>A</b> (corresponds to a correction in an earlier release) <b>B</b> (addition of feature), <b>C</b> (functional modification of feature) <b>D</b> (editorial modification) Detailed explanations of the above categories can be found in 3GPP TR 21.900.		Use <u>one</u> of the following releases: 2 (GSM Phase 2) R96 (Release 1996) R97 (Release 1997) R98 (Release 1998) R99 (Release 1999) REL-4 (Release 4) REL-5 (Release 5)

**Reason for change:** ⌘ In REL4 the measurement performance requirements for UP measurements in CELL\_PCH/URA\_PCH are missing from RAN4 specifications.

With the current signalling it is possible to configure the measurement interval for UP event triggered measurement reporting at values which are too small in CELL\_PCH/URA\_PCH which may lead to unnecessary battery consumption. The same case applies also for periodical reporting.

**Summary of change:** ⌘ UE positioning reporting in CELL\_PCH and URA\_PCH is made an UE capability. If the UE supports this capability it will comply to the measurement performance requirements that will be defined in Release 5 RAN4 specifications.

For UEs in CELL\_PCH/URA\_PCH the measurement interval for event triggered measurement reporting is specified to be at least 64 seconds in order to save battery life of the UE.

For UEs in CELL\_PCH/URA\_PCH the measurement reporting interval for periodical reporting is specified to be at least 64 seconds in order to save battery life of the UE.

**Isolated impact analysis:**  
 Impacted function is UE Positioning reporting in CELL\_PCH and URA\_PCH states.  
 The proposed changes are isolated impact to this functionality.  
 If the UE does not implement this CR then UTRAN has no means to know if the UE supports this capability and therefore UTRAN can not rely on the UP reporting in these states.

**Consequences if** ⌘ UP measurement reporting in CELL\_PCH, URA\_PCH is misaligned between

**not approved:** RAN2 and RAN4 specifications in REL4.

<b>Clauses affected:</b>	⌘	8.4.1.6.7, 10.3.3.45, 11.2, 11.5		
<b>Other specs affected:</b>	⌘	<input checked="" type="checkbox"/> Other core specifications	⌘	25.306
		<input type="checkbox"/> Test specifications		
		<input type="checkbox"/> O&M Specifications		
<b>Other comments:</b>	⌘			

### How to create CRs using this form:

Comprehensive information and tips about how to create CRs can be found at: [http://www.3gpp.org/3G\\_Specs/CRs.htm](http://www.3gpp.org/3G_Specs/CRs.htm). Below is a brief summary:

- 1) Fill out the above form. The symbols above marked ⌘ contain pop-up help information about the field that they are closest to.
- 2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be downloaded from the 3GPP server under <ftp://ftp.3gpp.org/specs/>. For the latest version, look for the directory name with the latest date e.g. 2001-03 contains the specifications resulting from the March 2001 TSG meetings.
- 3) With "track changes" disabled, paste the entire CR form (use CTRL-A to select it) into the specification just in front of the clause containing the first piece of changed text. Delete those parts of the specification which are not relevant to the change request.

## 8.4.1.6.7 UE positioning measurement

NOTE: ~~The applicability of UE positioning measurements in CELL\_PCH, URA\_PCH and CELL\_FACH needs to be aligned in all relevant specifications.~~

Upon transition from CELL\_DCH to CELL\_PCH or URA\_PCH, the UE shall

- ~~if the UE does not support UP measurement reporting validity in CELL\_PCH and URA\_PCH states as indicated in the IE "UE positioning capability" included in the IE "UE Radio Access Capability":~~
- ~~stop UE positioning measurement reporting.~~

~~Upon transition from CELL\_DCH to CELL\_FACH or CELL\_PCH or URA\_PCH state, Upon transition from CELL\_DCH to CELL\_FACH, or upon transition from CELL\_DCH to CELL\_PCH or URA\_PCH and if the UE supports UP measurement reporting validity in CELL\_PCH and URA\_PCH states as indicated in the IE "UE positioning capability" included in the IE "UE Radio Access Capability", the UE shall:~~

- ~~retrieve each set of measurement control information of measurement type "UE positioning" stored in the variable MEASUREMENT\_IDENTITY; and~~
- ~~if the optional IE "measurement validity" for this measurement has not been included:~~
  - ~~delete the measurement associated with the variable MEASUREMENT\_IDENTITY.~~
- ~~if the IE "measurement validity" for the measurement has been included, and the IE "UE state" has been assigned to value "CELL\_DCH":~~
  - ~~stop measurement reporting;~~
  - ~~store the measurement associated with the variable MEASUREMENT\_IDENTITY to be used after the next transition to CELL\_DCH state.~~
- ~~if the IE "measurement validity" for the measurement has been included, and the IE "UE state" has been assigned to value "all states":~~
  - ~~upon transition from CELL\_DCH to CELL\_PCH or URA\_PCH:~~
    - ~~if the choice in the IE "Reporting Criteria" included the IE "UE Positioning" stored in the variable MEASUREMENT\_IDENTITY is set to "UE positioning reporting criteria" and the value of the IE "Measurement interval" included in this IE is less than 4664 seconds:~~
      - ~~consider the value of the IE "Measurement interval" as being 4664 seconds;~~
    - ~~if the choice in the IE "Reporting Criteria" included the IE "UE Positioning" stored in the variable MEASUREMENT\_IDENTITY is set to "Periodical Reporting Criteria" and the value of the IE "Reporting interval" included in this IE is less than 4664 seconds:~~
      - ~~consider the value of the IE "Reporting Interval" as being 4664 seconds~~
  - ~~continue measurement reporting according to its UP measurement reporting capability;-~~
- ~~if the IE "measurement validity" has been included and the IE "UE state" has been assigned to value "all states except CELL\_DCH":~~
  - ~~upon transition from CELL\_DCH to CELL\_PCH or URA\_PCH:~~
    - ~~if the choice in the IE "Reporting Criteria" included the IE "UE Positioning" stored in the variable MEASUREMENT\_IDENTITY is set to "UE positioning reporting criteria" and the value of the IE "Measurement interval" included in this IE is less than 4664 seconds:~~
      - ~~consider the value of the IE "Measurement interval" as being 4664 seconds;~~
    - ~~if the choice in the IE "Reporting Criteria" included the IE "UE Positioning" stored in the variable MEASUREMENT\_IDENTITY is set to "Periodical Reporting Criteria" and the value of the IE "Reporting interval" included in this IE is less than 4664 seconds:~~

- consider the value of the IE "Reporting Interval" as being 1664 seconds
- resume this measurement and associated reporting according to its UP measurement reporting capability;
- if the transition is due to a reconfiguration message which included the IE "Primary CPICH info" (for FDD) or "Primary CCPCH info" (for TDD), and the UE selects a cell other than that indicated by this IE; or
- if the transition is due to a reconfiguration message which does not include the IE "Primary CPICH info" (for FDD) or "Primary CCPCH info" (for TDD); or
- if the transition is not due to a reconfiguration message:
  - delete the assistance data included in the variable UE\_POSITIONING\_OTDOA\_DATA\_UE\_BASED, UE\_POSITIONING\_OTDOA\_DATA\_UE\_ASSISTED and UE\_POSITIONING\_GPS\_DATA.
  - if the IE "Positioning Methods" stored in the variable MEASUREMENT\_IDENTITY is set to "OTDOA" or "OTDOA or GPS":
    - if the IE "Method type" stored in the variable MEASUREMENT\_IDENTITY is set to "UE-based" or "UE assisted preferred but UE-based allowed" or "UE-based preferred but UE-assisted allowed":
      - begin monitoring assistance data received in System Information Block type 15.4 and System Information Block type 15.5 according to subclause 8.1.1.6.15.
    - if the IE "Method type" stored in the variable MEASUREMENT\_IDENTITY is set to "UE-assisted":
      - begin monitoring assistance data received in System Information Block type 15.4 according to subclause 8.1.1.6.15.
  - if the UE is in CELL\_FACH state:
    - if the IE "UE positioning OTDOA neighbour cell list for UE assisted" stored in the variable UE\_POSITIONING\_OTDOA\_DATA\_UE\_ASSISTED or UE\_POSITIONING\_OTDOA\_DATA\_UE\_BASED contains neighbour cells on other frequencies than the current frequency:
      - perform measurements on other frequencies according to the IE "FACH measurement occasion info".

The UE may:

- if the IE "Positioning Methods" stored in the variable MEASUREMENT\_IDENTITY is set to "GPS" or "OTDOA or GPS":
  - begin monitoring assistance data received in System Information Block type 15 and/or System Information Block type 15.1 and/or System Information Block type 15.2 and/or System Information Block type 15.3 according to subclause 8.1.1.6.15.

## 10.3.3.45 UE positioning capability

Information Element/Group name	Need	Multi	Type and reference	Semantics description
Standalone location method(s) supported	MP		Boolean	Defines if a UE can measure its location by some means unrelated to UTRAN TRUE means supported
UE based OTDOA supported	MP		Boolean	TRUE means supported
Network Assisted GPS support	MP		Enumerated ('Network based', 'UE based', 'Both', 'None')	Defines if the UE supports network based or UE based GPS methods.
Support for GPS timing of cell frames measurement	MP		Boolean	Defines if a UE has the capability to perform the UE GPS timing of cell frames measurement [7]. TRUE means capable
Support for IPDL	MP		Boolean	Defines if a UE has the capability to use IPDL to enhance its 'SFN-SFN observed time difference –type 2' measurement. TRUE means supported
Support for Rx-Tx time difference type2 measurement	MP		Boolean	TRUE means supported
Support for UP measurement <u>reporting validity</u> in CELL_PCH and URA_PCH states	MD		Enumerated (true)	<u>Absence of this element means not supported and presence means supported.</u> <u>Note 1.</u>

NOTE 1: The performance requirements for this capability are defined in Release 5.
