Progress Report since the last TSG (for all involved WGs):

At RAN3#37 a contribution was treated and it was agreed that there were benefits and that solution 2, which is a measurement procedure between DRNC and SRNC is the most appropriate solution. The work to implement the changes involved can be done through TEI6 or a new work item. Version 2.0.0 of the TR 25.801 has been approved by RAN3 and is presented for approval.

List of Completed elements (for complex work items):

?? All

List of open issues:

?? None

Estimates of the level of completion (when possible): 100 %
