Release 99 specific activities

■ Encoding of SIB over Iub

- obviously two different interpretations of how to convey SIB data over NBAP

Alternative 1: RRC encoded in RNC as a bitstring of variable or fixed size

Alternative 2: RRC encoding partially in NodeB

- no consensus so far
- solutions expected until next RAN TSG

■ RL Addition @ inter-frequency intra NodeB HO

- discussions on applicability of RL Addition
- common understanding reached
- status

Iub: no need for CRs identified so far on Iub,

Iur: further discussions needed

- **Request from T1P1 to include references to ANSI standards for signalling transport protocols from Release 99 onwards**
 - see LS in in RP-040356
 - already ANSI references in physical layer specification
 - individual members tasked to prepare CRs for next RAN3
 - CN informed (lu impact) (see RP-040357)

Release 4 specific activities

■ TDD related CRs on NBAP
