Title: Specs lists per Release; a comparison

Document for: information

TSGs CN, T and RAN are used to seeing draft CRs to 01.01 / 41.101 and 21.101 at each plenary meeting. Those CRs were then corrected in the light of the meetings currently taking place, and approved at the end of the SA plenary.

Now that Release 6 versions of these Technical Specifications exist, the task of reviewing the CRs is beginning to become unmanageable for delegates and Specs Manager alike. Therefore, although those CRs will still be produced, they will be presented only to SA. For the TSGs which meet in the preceding week, the matrix in this document is provided instead. It is easier to see at a glance which TS and TR appears in each Release, and it is even possible to identify the current version of each spec.

The attached Excel table is copied from the 3GPP web site page <a href="http://www.3gpp.org/ftp/Specs/html-info/SpecReleaseMatrix.htm">http://www.3gpp.org/ftp/Specs/html-info/SpecReleaseMatrix.htm</a> which is regularly updated.

## **3GPP Specification Release version matrix**

This table shows the versions which exist in each Release of the 3GPP specifications.

Versions in bold green are current and under active maintenance.

Versions in italic red are withdrawn.

Where no version is shown for a given Release, there is no valid spec for that Release.

Phase 1 DCS and Extension Releases are shown separately from Phase 1 proper.

The "UMTS" Release indicates specs produced by ETSI TC SMG prior to the creation of 3GPP. (These specs have a "U" suffixed to their number.)

The "R00" Release was abandoned in favour of Rel-4 and Rel-5.

The 13.-series specifications (which relate to European regulatory requirements) are included in the table for information. On closure of ETSI TC SMG, the active ones were transferred to TC MSG; the version shown in the table reflects that current at the time of the transfer and should NOT be used to indicate the current version.

Click on a specification number for detailed information on it.

The Releases of little interest (Phase 1 in its various guises, Phase 2, ex-SMG-UMTS, and the defunct R00) are hidden in the table, but if necessary can easily be revealed by selecting the table and choosing Format | Column | Unhide. The table can be filtered by Working Group using the pull-down arrows in the header row.

The Releases of little interest (Phase 1 in its various guises, Phase 2, ex-SMG-UMTS, and the defunct R00) are hidden in the table, but if necessary can easily be revealed by selecting the table and choosing Format | Column | Unhide. The table can be filtered by Working Group using the pull-down arrows in the header row.
