## 1. Introduction

For RRM test cases RAN4 currently maintains TS 25.133 Annex A. This Annex specifies test specific parameters for some of the functional requirements. Then RAN5 copies the content of Annex A into the relevant sections of TS 34.121 and develops the detailed test cases. If RAN5 encounters problems while developing the detailed test cases it liaises with RAN4 to get clarification and/or to modify Annex A of TS 25.133. In the past this has led to several liaisons between the 2 groups. Also the duplication of information in general leads to consistency problems.

RAN5 has discussed this topic and agreed on the proposal described below. In the long term it would make sense to maintain the information currently contained in Annex A of TS 25.133 only in one place: in TS 34.121.

## 2. Proposal

Based on information to be provided from RAN5 which shows the consistency of TS 34.121 with TS 25.133 Annex A for a specific Release it is proposed to remove Annex A of TS 25.133 for R99 and then for Rel-4. TS 34.121 is made consistent with Annex A for each Release by RAN5. RAN4 then agrees a CR which removes Annex A for that specific Release and add a note similar to "This Annex has been removed from this release of the specification because the content is covered in TS 34.121."

## 3. Action to RAN4:

Check if above proposal is acceptable.

## 4. Date of Next TSG-RAN WG5 Meetings:

TSG-RAN5 Meeting #28, 22nd – 26th August 2005	Berlin
TSG-RAN5 Meeting #29, 7th – 11th November 2005	Asia
