IN SUPPORT OF WID RP-162071 “450MHz E-UTRA FDD Band for LTE PPDR and PMR/PAMR in Europe”

450 MHz Alliance is a non-profit international consortium that represents interests of and brings together operators, spectrum owners and investors as well as equipment and solution vendors to drive the development of mobile networks in the 450 MHz frequency band worldwide. Among our members are Nokia, Qualcomm and Huawei who strongly support 450 MHz band development. 450 MHz Alliance is a strong advocate for 450 MHz frequency band to be used for M2M applications of many kinds, including but not limited to utilities, transportation, security and other business and mission critical communication.

450 MHz Alliance is fully supportive of WI, for the implementation of the new 450 MHz bands allows to further expand 450 MHz ecosystem and to providing most secure and reliable communication for such critical services as PPDR and PMR/PAMR.

Considering above, 450 MHz Alliance are asking the RAN Plenary to approve the mentioned WI and assign necessary resources for its successful implementation.

Respectfully,

Igor Virker
450 MHz Alliance managing director
