

3GPP TSG RAN#82
10-13 December, 2018
Sorrento, Italy

RP-182612
Agenda Item 9

Observations on RAN1 TU

MediaTek

- RAN TU planning vs RAN1 TU usage are *completely* misaligned
- E.g. NR-U (other WI/SI follow a similar pattern)

	TU Budget for Q4'18	RAN1#94bis (Oct.)	RAN1#95 (Nov.)	
Observed Online Time	5 TUs = 10hrs	7.5hrs	9.5hrs	
Observed Offline Time	N/A	23.5hrs !	30hrs !	Hidden TUs

- Discussion required at RAN#82
 - Plenary TU planning must be followed by RAN1 leadership
 - Use of offline time must be regulated by plenary, fully enforced by WG leadership
 - No arranged facilities for offline time – proper working environment is required
 - Interest level for NR evolution is understandably high – TUs for LTE and IoT need to be revisited

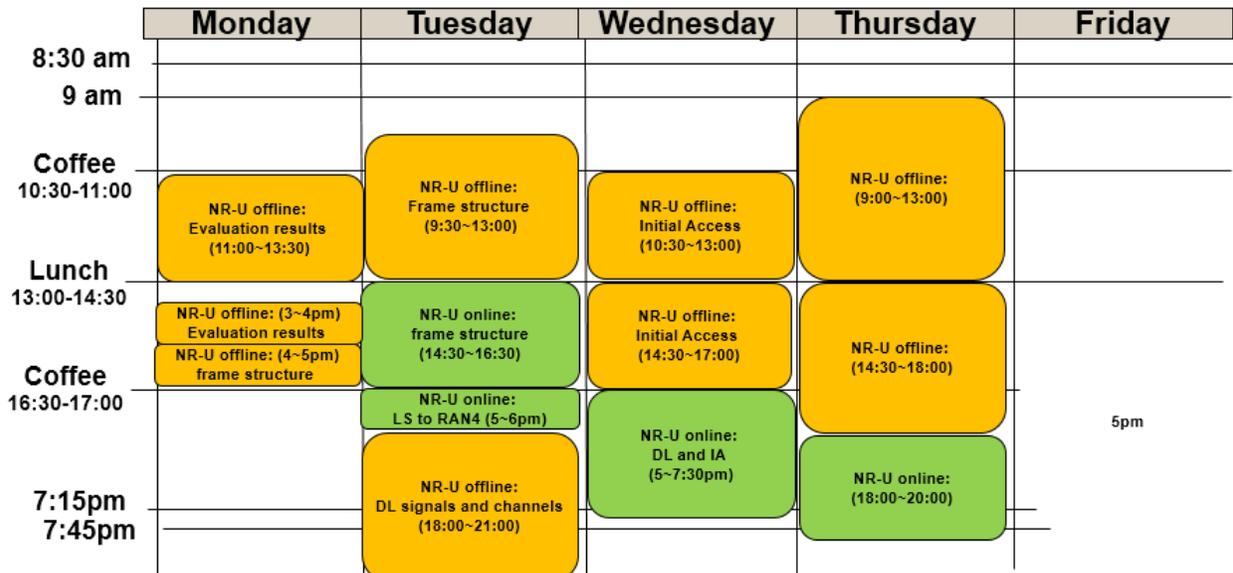

Proposals

1. Revisit the “available” TUs for new WI/SI approval in RAN#82
2. RAN to regulate the use of offline time in WG meetings

Appendix

- Observations on NR-U online/offline discussion time in 2018/Q4

RAN1#94bis

RAN1#95
