Title: Crossing of Reset message
Document for: Decision

[1] 25.413 RANAP Specification v1.1.1

1. Abstract
   When the entity has sent a Reset message and is waiting for a Reset Acknowledge message, but
   receives a Reset message from peer entity, it is FFS in current RANAP specification. This
   contribution proposes some text description.

2. Crossing of Reset Message
   When the entity has sent a Reset message and is waiting for a Reset Acknowledge message, but
   receives a Reset message from entity, the sending entity stop timer T(RafC or RafR) and sends a
   Reset Acknowledge message to the peer entity.

3. Proposal
   It is proposed to include the text of chapter 2 of this contribution into the RANAP Specification.
