SA WG2 has received the Draft report (S2-010267) from the SA ad hoc meeting on LCS issues in London 11th and 12th January 2001. According to the report it was agreed in the ad hoc meeting that a new Work Item will be proposed in RAN regarding the open interface between a 3G-SMLC and RNC.

It was also agreed in the ad hoc meeting that a proposal will be made to TSG-SA to withdraw the work item agreed in TSG-SA#10 in SP-000685. SA WG2 agrees with this view and recommends that the SA Work Item in question is withdrawn, pending RAN approval of the proposed Work Item, since the new LCS interface is a RAN internal matter and will be covered by the proposed new RAN Work Item.
