## Change in Clause 6.3.7

### 6.3.7 ManagedEntity

#### 6.3.7.1 Definition

The IOC ManagedEntity represents the role that can be played by an instance of an IOC defined in Network Resources Models, e.g. Generic Network Resource Model, Core Network Resource Model, UTRAN Network Resource Model or GERAN Network Resource Model. [It also represents the role that can be played by an instance of VSE subclass of 3GPP defined NRM IOCs or VSE defined NRM IOCs.](#) ManagedEntity is used in the specification of PMIRP operations to represent an instance of an IOC defined in these Network Resource Models.

**Change in Clause 7.3.3.5**

**7.3.3.5 Post-condition**

measurementJobIsSuspended AND notifyThresholdMonitorStatusChangedEmitted AND notifyMeasurementJobStatusChangedEmitted.

Assertion Name	Definition
MeasurementJobsSuspended	The MeasurementJob identified by measurementJobId is suspended. It means the following. (a) All files open for capturing measurement results are closed. (b) If one of the files closed contain measurement data, a notifyFileReady is emitted indicating the availability of the file(s). (c) No more reading of measurementType values. (d) <del>(e)</del> —The MeasurementJob.jobStatus is set to 'Suspended'. (e) <u>For an IRPAgent using the measurement result data for threshold monitoring, the detection of the related performance alarm conditions is suspended.</u>
<u>notifyThresholdMonitorStatusChangedEmitted</u>	<u>The notifyThresholdMonitorStatusChanged is emitted, if the ThresholdMonitor behaviour is dependent on the availability of the measurement result.</u>
notifyMeasurementJobStatusChangedEmitted	The notifyMeasurementJobStatusChanged is emitted.
