1. Overall Description:

SA2 would like to thank ETSI TISPAN for their Liaison Statement regarding the Workshop on "IMS over Fixed Access" to be held on March 30th – 31st 2005.

SA2 is pleased to inform relevant 3GPP working groups and other interested SDOs.

SA2 is also happy with the proposed agenda and list of issues, and believes it would be relevant for the following 3GPP working groups to be involved in those discussions:

- o IMS Specifications endorsement (Architecture, Requirements, SIP Profile...): SA1, SA2, CN1
- o Services and Supplementary services specification: CN1, CN3
- o User identification: SA2, CN4, SA3
- o Authentication (ISIM/Login-password/EAP) and Security (IPsec/TLS) mechanisms: SA3
- o "Gq" requirements: SA2, CN3
- o QoS Classes: SA2, CN3
- o Audio and Video Codecs use: SA4
- o Emergency communications and Legal interception requirements: SA2, SA3

Therefore SA2 would like to encourage 3GPP delegates from those groups to participate to the workshop.

Regarding the "Backbone Network issues and Interconnection schemes", SA2 believes GSMA/GSMA IREG is more competent to address this issue. If TISPAN would like to address this issue during the workshop, SA2 would suggest GSMA IREG to participate to the workshop.

In addition, SA2 also recognizes the need to address during this workshop, issues regarding the planning and completion date of TISPAN Release 1 and 3GPP Rel-7 work items.

2. Actions:

To ETSI TISPAN

ACTION: To take note of above.

3. Dates of Next SA2 Meetings:

SA2#45	4 th - 8 th April 2005	Beijing, China
SA2#46	9 th – 13 th May 2005	Athens, Greece
