Title: Proposed LS on R00 working methods

Document for: Approval

Agenda Item:

From: TSG-SA WG3

To: TSG SA WG2 Intergroup co-ordination chair persons ad-hoc

Title: Liaison Statement on R00 working methods

TSG-SA WG3 have been presented with v.0.9 of the proposal for the Release 2000 Features, Building Blocks and Work Tasks produced by the TSG SA WG2 intergroup co-ordination chair persons ad-hoc meeting.

The following questions were asked of each WG:

- To review the proposal
- To provide comments by 17th April
- To create for the next TSG plenaries the corresponding work items - if agreeing with the proposal - specifying in particular the foreseen completion date

After brief consideration due to the tight timescales, S3 have accepted the proposed working methods. Furthermore, at this stage, S3 do not have any significant comments on the working methods. S3 will now start to draft work items in accordance with the proposals.

As an initial input to the process, S3 have endorsed a draft list of security deliverables in the attached R00 workplan. This should be used as the basis of the security section in the proposal for the Release 2000 Features, Building Blocks and Work Tasks. Note that the workplan was drafted prior to S3 reviewing the proposals and therefore it does not adopt the proposed working methods.
