Subject: Move of TS 33.200 - Network Domain Security from Rel-4 to Rel-5

Contact: Stefan Puetz, T-Mobil. mailto: stefan.puetz@t-mobil.de

SA WG3 decided at their meeting #17, in Göteborg, Sweden, that the completion of TS 33.200 could not be achieved for the Rel-4 time frame. SA WG3 therefore decided to move this feature to Rel-5.

SA WG3 kindly ask CN WG4 to take this into account in their specifications.
