TSG SA1 thanks CN1 for their Liaison Statement on Usage of Private ID. In this LS CN1 asks the following questions:

Questions from CN1:

1. Is there a need to support third party SIP registration for IMS i.e. to allow SIP Registration other than the subscriber. CN1 believes that this capability is not needed for Release 5 ?
2. CN1 will be interested to know if the 3rd party registration requirement will be required in subsequent releases.

Answers:

1. Confirmation that the 3rd Party SIP Registration capability is not required for Release 5

SA1 would like to inform CN1 that the current assumption is correct, and 3rd party SIP registration capability is not a current requirement for Release 5.

2. CN1 will be interested to know if the 3rd party registration requirement will be required in subsequent releases

SA1 believes, that 3rd party SIP registration may become a service requirement in future releases. However 3rd party SIP registration by another user definitely has, among others, potential security implications which will require further work.
