1. Overall Description:

SA1 kindly thank SA3 for its LS (S3-010700) on Push Service in regard to security issues. The SA3 LS provides assistance in defining the Push service requirements in this area.

Regarding the comments and suggestions, SA1 has incorporated some in the new text but please note:

- ◆ In regard to authentication, that would seem to be a protocol issue which would be more detailed than the service requirement appropriate to a stage 1.
- ◆ In regard to the denial of messages, there is continuing discussion on denial of messages. It seems that the user may be able to deny messages based on trust level.

The Push service stage 1 schedule has changed: the goal is completion for Release 6.

SA1 are further refining the Push stage 1, and will use the SA3 comments and questions in clarifying the draft text charging for rejected push content.

SA1 are providing the new draft Push stage 1 for SA3 in a separate LS.

2. Actions:

To SA3 group.

Please provide comments and suggestions on the draft.
