1. Overall Description:

This LS is sent for ACTION. SA5 have asked the other working groups to review and comment on TS 32.140 on Subscription Management Requirements. SA2 have not been able to review this draft Rel5 specification in detail, but would like to comment that any references to Generic User Profile (GUP) specifications (i.e. [11] to [14]), or requirements for support of GUP should be removed, since GUP will not be included in Rel5.

On the specific observations related to SA5's review of TS 23.240, v0.3.0, SA2 would like to inform SA5 that GUP joint Ad-Hoc group has invited SA2 to continue the development of this document. SA2 have revised the structure and content of TS 23.240, and those issues that SA5 are referring to in their specific observations, are not any longer included in TS 23.240. The new version 0.4.0 of this draft Rel6 specification is sent for information to all working groups involved in the 3GPP GUP work in a separate liaison statement.

2. Actions:

To SA5.

ACTION: SA5 to take into account SA2's comment on the removal of any references to GUP (that is a Rel6 issue), or requirements for support of GUP in TS 32.140 for Rel5.
