**Subject:** FW: Results from recent IETF coordination meeting (mail#4)

My appologies, I realized I forgot SA3 on the distribution list.

Regards, Stephen

Subject: Results from recent IETF coordination meeting (mail#4)

Dear Colleagues,

As part of the ongoing coordination effort between the 3GPP and IETF, I would like to report the results of recent discussions between the IETF ADs, myself, and various IETF WG chairs, editors and rapporteurs (Conference call held May 10).

The recent discussions covered the status of the IETF dependencies and the allocation of work to bundles. The current status is shown below. The SIP parts should align with what is on Dean Willis' SIP bundle tracking page. The name beside each draft is the person who is responsible for pushing the work.

A new bundle (bundle 4) has been added. For the nai and privacy drafts (which are still in a state of flux) it may be necessary to have a late conference call or some other mechanism to agree to CRs for the June plenary. The CRs would have wildcards for the actual RFC numbers which the MCC would insert during implementation.

Regards,

Stephen Hayes
