Status	Approved
Serial Number	21329

MPEG Systems would like to inform you that we are developing and finalizing a VVC CMAF Media profile which is planned to be part of ISO/IEC 23000-19 3rd edition and currently Final Draft International Standard of which is being prepared for ballot.

We invite you to review the current draft of FDIS (WG03N0480). The VVC profile is in Annex M. We wish to verify with you and other standards organization who would use such profile that the draft VVC profile meets your requirements with the goal of creating a common profile usable globally. If that is not the case, please provide your feedback on which constraints are not met.

Please submit your comments electronically preferably by 2022/02/17 at open repository for CMAF, <https://github.com/MPEGGroup/CMAF/issues/new/choose>, with a prefix in the title [3ED]. Please also review and comment on inputs from others.

To facilitate the review process, we have scheduled two online conferences of AHG on Application Format:

- 2022/02/24, 1600-1700 UTC (0800 PST)
- 2022/03/14, 1500-1600 UTC (0800 PDT)

The primary purpose of these conferences is to discuss interactively comments that have not reached consensus on github.

After the March meeting, AHG on Application Format will work to prepare a joint input contribution to the coming MPEG Systems meeting from 2022/04/25 to 2022/04/29 whose contribution deadline is 2022/04/20.

You are encouraged to send liaison delegates not only to the above-mentioned meetings of AHG on Application Format but also to MPEG Systems meeting. The detailed MPEG Systems meeting schedule will be developed close to the meeting start date.

We look forward to collaborating with you on this important profile.
