28	CM	Configuration Management
29	CMIP	Common Management Information Protocol
30	CN	Core Network
31	CORBA	Common Object Request Broker Architecture
32	EM(S)	Element Management (System)
33	FM	Fault Management
34	GDMO	Guidelines for the Definition of Managed Objects

1	IDL	Interface Definition Language
2	IOC	Information Object Class
3	IRP	Integration Reference Point
4	IS	Information Service(s)
5	Itf-N	Interface-N / Northbound Interface (EM-NM/OSS Interface)
6	NAM	Network Architecture Model
7	NM(S)	Network Management (System)
8	NRM	Network Reference Model (context: 3GPP2 Architecture)
9	NRM	Network Resource Model (context: 3GPP2 OAM&P)
10	OAM&P	Operations, Accounting, Maintenance & Provisioning
11	OSS	Operations Support System(s)
12	PM	Performance Management
13	RAN	Radio Access Network
14	SS	Solution Set
15	TMF	TeleManagement Forum
16	TMN	Telecommunications Management Network (ITU-T)
17	UML	Unified Modeling Language
18	<i>See also Annex E for additional abbreviations.</i>	

19 **GENERAL**

20 This document contains the OAM&P requirements and interface definitions for
21 cdma2000-based systems. It is an extension of operations and maintenance
22 requirements, per latest 3GPP Release 4 32-series specifications capabilities to
23 enable operation in a cdma2000 systems environment as part of the
24 TIA/EIA/IS-2000 family of standards. They are in alignment with OAM&P Stage
25 1 IS-2000 requirements defined in [01].

26 These requirements are expressed as additions to and/or exclusions from the
27 Release 4 specification of the 3GPP 32-series. This specification is therefore
28 composed as “delta” document. The 3GPP 32-series specifications are included
29 as a reference. It is intended that all upgrades to the 32-series Release 99
30 specification will also apply to this “delta” document.

32
33 This OAM&P Stage 2/3 for cdma2000 contains recommendations and
34 requirements related to:

- 35 ▪ Logical and physical management architecture.

- 1 ▪ General configuraton, fault and perfomance management
2 requirements.
- 3 ▪ Definitions for the management interface between element
4 management function and network mangement system.

5

6 For Revision A of this document 3GPP Charging and Billing requirements and
7 related definitions are not applicable. In addition CMIP Solution Set
8 specifications are not applicable for Revision A.

9 **Overview of OAM&P for cdma2000 (3GPP Delta Specification)**

10 The structure of this document is aligned with the structure of the 3GPP 32-series
11 of specifications (excluding the Billing and Charging related definitions
12 specified within the 32.2xx-series as well as CMIP Solution Set specifications):

- 13 ▪ 32.101 "3G Telecom Management: Principles and high level
14 requirements" (see [02]) contains complementary and extended
15 requirements to [01] as well as the definition of the logical
16 management architecture.
- 17 ▪ 32.102 "3G Telecom Management architecture" (see [03]) defines a
18 framework to help define a telecom management physical
19 architecture and to adopt standards and provide products that are
20 easy to integrate.
- 21 ▪ The 32.111-series (see [04]-[07]) contains fault management
22 requirements as well as related definitions for the management
23 interface between element management function and network
24 mangement system (Alarm IRP).
- 25 ▪ The 32.3xx-series (see [08]-[14]) contains common IRP definitions
26 (currently Notification IRP, Generic IRP).
- 27 ▪ Specification 32.401 (see [15]) contains general requirements on
28 performance management, specifications for the structure and
29 transfer of measurement files. *Measurements definition for
30 cdma2000 is for further study (UMTS & GSM measurements defined
31 by 3GPP SA5 are not applicable for cdma2000).*

- 1 ■ The 32.6xx-series (see [17]-[41])contains configuration management
2 requirements as well as related definitions for the management
3 interface between element management function and network
4 mangement system (Basic CM IRP, BulkCM IRP, applicable NRM
5 IRP's).
- 6 ■ Subsequent Annexes provide detailed delta definitions as necessary
7 for some 32-series specifications:
 - 8 ■ Annex A contains the Network Resource Model (NRM) for the
9 3GPP2 Generic Network Resources
 - 10 ■ Annex A.1 contains the Information Services (IS)
11 definitions of the 3GPP2 Generic NRM
 - 12 ■ Annex A.2 contains the CORBA Solution Set (SS)
13 definitions of the 3GPP2 Generic NRM
 - 14 ■ Annex A.3 will contain the XML Solution Set (SS)
15 definitions of the 3GPP2 Generic NRM in a future
16 version of this document (currently defined within
17 Annex D)
 - 18 ■ Annex B contains the Network Resource Model (NRM) for the
19 3GPP2 Core Network Resources (CN)
 - 20 ■ Annex B.1 contains the Information Services (IS)
21 definitions of the 3GPP2 CN NRM
 - 22 ■ Annex B.2 contains the CORBA Solution Set (SS)
23 definitions of the 3GPP2 CN NRM
 - 24 ■ Annex B.3 contains the XML Solution Set (SS)
25 definitions of the 3GPP2 CN NRM in a future version of
26 this document (currently defined within Annex D)
 - 27 ■ Annex C contains the Network Resource Model (NRM) for the
28 3GPP2 Radio Access Network (RAN)
 - 29 ■ Annex C.1 contains the Information Services (IS)
30 definitions of the 3GPP2 RAN NRM
 - 31 ■ Annex C.2 contains the CORBA Solution Set (SS)
32 definitions of the 3GPP2 RAN NRM

- 1 ▪ Annex C.3 contains the XML Solution Set (SS)
2 definitions of the 3GPP2 RAN NRM in a future version
3 of this document (currently defined within Annex D)
- 4 ▪ Annex D specifies the 3GPP2 specifics of the BulkCM XML Solution
5 Set (currently including the XML definitions for 3GPP Generic NRM,
6 3GPP2 Generic NRM, 3GPP2 CN NRM, and 3GPP2 RAN NRM).
- 7 ▪ The two final Annexes provide informative information:
 - 8 ▪ Annex A “Terminology” provides a mapping between UMTS
9 and cdma2000 terminology for clarification purpose.
 - 10 ▪ Annex B “Integration Reference Points - IRPs” contains an
11 IRP overview for information purpose.

1 **32.101 "3G Telecom Management: Principles and high level requirements"**

2 (see [02])

3 **General Exceptions**

4 The term UMTS is not applicable for the cdma2000 family of standards.
5 Nevertheless the term UMTS is used in 3GPP 32.101 [02] mostly in the broader
6 sense of "3G Wireless System". If not stated otherwise there are no additions or
7 exclusions required.

8 **Specific Exceptions**

9 *Chapter 01: Scope*

10 There are no additions or exclusions.

11 *Chapter 02: References*

12 Normative Reference on TS 22.101 and TS 22.115 are not applicable for
13 cdma2000 systems.

14 *Chapter 03: Definitions and abbreviations*

15 There are no additions or exclusions.

16 *Chapter 04: General*

17 The UMTS reference model introduced in chapter 4.1.2 ("UMTS Reference
18 Model") is not applicable for cdma2000 systems (including the listed
19 signalling mechanisms). The IS-2000 Network Reference Model and
20 network interfaces will apply (see [50]).

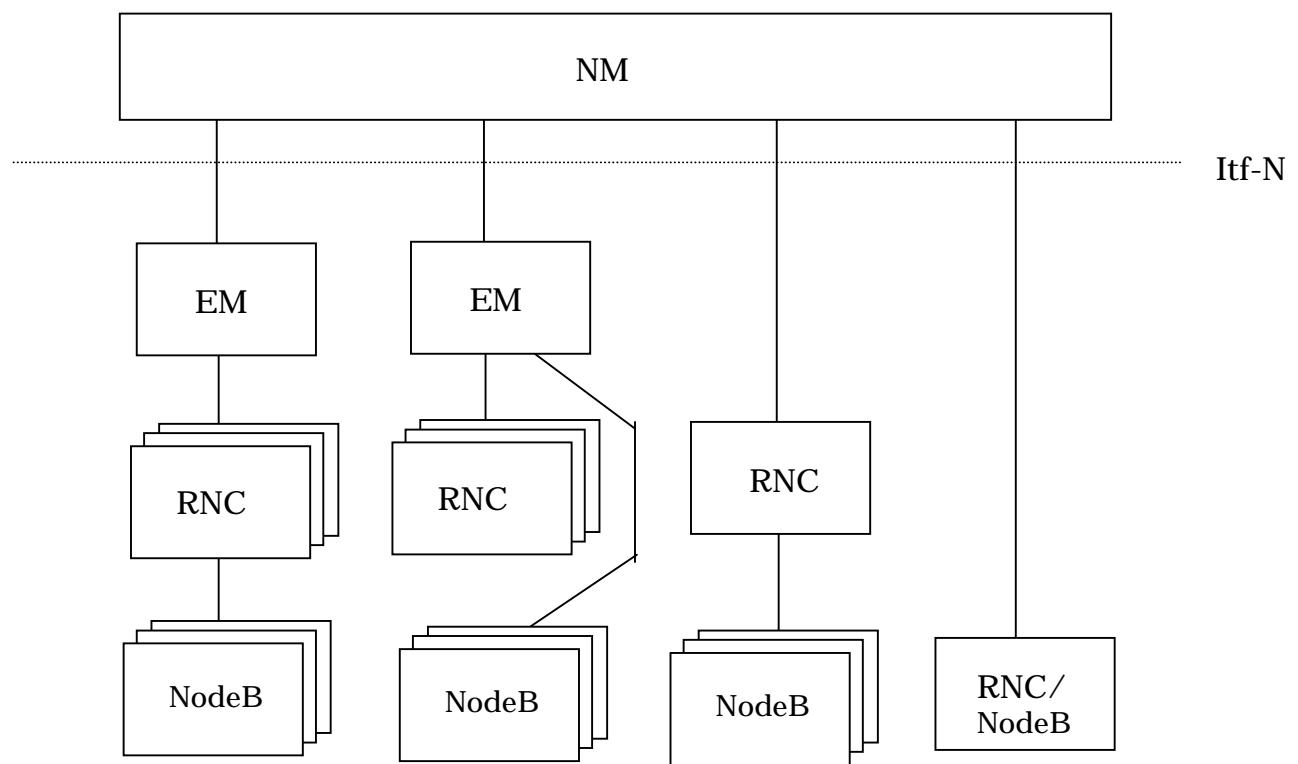

21 Reference on TS 22.101 in chapter 4.1.3 ("UMTS Provisioning Entities") is
22 not applicable for cdma2000 systems.

23 *Chapter 05: Architectural Framework*

24 With respect to chapter 5.2 ("Interface levels") the following clarifications
25 shall apply:

- 1 ➤ Itf-N is the “Northbound” interface between the Network
 2 Management System and the Element Manager/Network Element.
 3 ➤ RNC is equivalent to BSC in cdma2000 systems and shall be
 4 interpreted as such.
 5 ➤ NodeB is equivalent to BTS in cdma2000 systems and shall be
 6 interpreted as such.
 7 ➤ IubLink is equivalent to Abis in cdma2000 systems and shall be
 8 interpreted as such.

9 Typical configurations on interfaces between the network and
 10 management components is shown below (where RAN network elemtns
 11 are used as an example):

34 *Chapter 06: UMTS Management Processes*

35 There are no additions or exclusions.

1 *Chapter 07: UMTS Management Functional Architecture*

2 Chapter 7.9 (“Accounting Management”) is not applicable for the IS-2000
3 Release B version of this document (see also related statement in section
4 “General” of this document).

5 *Annex A (normative): UMTS Management Application Layer Protocols*

6 There are no additions or exclusions.

7 *Annex B (normative): UMTS Management Network Layer Protocols*

8 There are no additions or exclusions.

9 *Annex C (normative): UMTS Management IRP Solution Sets*

10 CMIP Solution Set specification are not applicable for Revision A of this
11 document.

12 *Annex D (informative): QoS Management*

13 There are no additions or exclusions.

14 *Annex E (informative): Change history*

15 Additions or exclusions are not applicable.

1 **32.102 "3G Telecom Management architecture"**

2 (see [03])

3 **General Exceptions**

4 The term UMTS is not applicable for the cdma2000 family of standards.
5 Nevertheless the term UMTS is used in 3GPP 32.102 [03] mostly in the broader
6 sense of "3G Wireless System". If not stated otherwise there are no additions or
7 exclusions required.

8 **Specific Exceptions**

9 *Chapter 01: Scope*

10 There are no additions or exclusions.

11 *Chapter 02: References*

12 Normative Reference on TS 23.002 and TS 23.101 are not applicable for
13 cdma2000 systems.

14 *Chapter 03: Definitions and abbreviations*

15 There are no additions or exclusions.

16 *Chapter 04: General*

17 The UMTS reference model introduced in chapter 4.1.1 ("UMTS Reference
18 Model") is not applicable for cdma2000 systems (including the listed
19 signalling mechanisms). The IS-2000 Network Reference Model and
20 network interfaces will apply (see [50]).

21 *Chapter 05: General view of UMTS Management Physical architectures*

22 There are no additions or exclusions.

23 *Chapter 06: Basic objectives for a UMTS Physical Architecture*

24 There are no additions or exclusions.

1 *Chapter 07: TM Architectural aspects*

2 The OSF instantiations presented within Figure 7.2 of chapter 7.3.2
3 ("Interfaces") are not applicable for cdma2000. The IS-2000 Network
4 Reference Model and related interworking with 2G systems might apply
5 (see [50]).

6 The network components presented within entities of figures 7.3a (Basic
7 AN entities), 7.3b (Basic CN entities), 7.3c (Examples of Service Specific
8 entities) and 7.3d (Basic User Equipment) within chapter 7.3.3 ("Basic
9 entities of a UMTS") are not applicable for cdma2000 systems. The IS-
10 2000 Network Reference Model and network interfaces will apply (see
11 [50]). Nevertheless the intend of presenting a view on "building blocks" is
12 valid for cdma2000 systems as well.

13 *Chapter 08: UMTS Management Physical architectures*

14 Interface definitions made in Chapter 8.3 ("Subnetwork Management
15 Architecture") on resource management functions between RNC and
16 NodeB are not applicable for cmda2000 systems. For clarification please
17 note:

- 18 ➤ RNC is equivalent to BSC in cdma2000 systems and shall be
19 interpreted as such.
- 20 ➤ NodeB is equivalent to BTS in cdma2000 systems and shall be
21 interpreted as such.

22 *Chapter 09: TMN applications*

23 There are no additions or exclusions.

24 *Chapter 10: Integration Reference Points (IRPs)*

25 There are no additions or exclusions.

26 *Chapter 11: Implementation aspects*

27 There are no additions or exclusions.

28 *Chapter 12: UMTS TMN Conformance*

29 There are no additions or exclusions.

30 *Chapter 13: TMN planning and design considerations*

31 There are no additions or exclusions.

1 *Chapter 14: Mediation/Integration*

2 There are no additions or exclusions.

3 *Annex A (informative): Technology considerations*

4 There are no additions or exclusions.

5 *Annex B (informative): Overview of a UMTS Network*

6 The Element Management Domains and Interfaces presented and
7 described are not applicable for cdma2000 systems. The IS-2000 Network
8 Reference Model and network interfaces will apply (see [50]).

9 *Annex C (informative): Information Service template*

10 There are no additions or exclusions.

11 *Annex D (informative): Example of inheritance between ISs*

12 There are no additions or exclusions.

13 *Annex E (informative): General rules for Solution Sets*

14 There are no additions or exclusions.

15 *Annex F (normative): Rules for CORBA Solution Sets*

16 There are no additions or exclusions.

17 *Annex G (informative): Change history*

18 Additions or exclusions are not applicable.

1 **32.111-series “Fault Management”**

2 (see [04]-[06])

3 **General Exceptions**

4 There are no global additions or exclusions for 3GPP 32.111-1 [04], 3GPP
5 32.111-2 [05], 3GPP 32.111-3 [06].

6 **Specific Exceptions**

7 **32.111-1 "Fault Management; Part 1: 3G Fault Management Requirements"**

8 (see [04])

9 *Chapter 01: Scope*

10 There are no additions or exclusions.

11 *Chapter 02: References*

12 There are no additions or exclusions.

13 *Chapter 03: Definitions and abbreviations*

14 There are no additions or exclusions.

15 *Chapter 04: Fault Management concept and requirements*

16 There are no additions or exclusions.

17 *Chapter 05: N interface (If-N)*

18 There are no additions or exclusions.

19 *Annex A (informative): Change history*

20 There are no additions or exclusions.

1 **32.111-2 "Fault Management; Part 2: Alarm Integration Reference Point:**
 2 **Information Service (Release 4)"**

3 (see [05])

4 *Chapter 01: Scope*

5 There are no additions or exclusions.

6 *Chapter 02: References*

7 There are no additions or exclusions.

8 *Chapter 03: Definitions and abbreviations*

9 There are no additions or exclusions.

10 *Chapter 04: Basic aspects*

11 There are no additions or exclusions.

12 *Chapter 05: Information Object Classes*

13 There are no additions or exclusions.

14 *Chapter 06: Interface Definition*

15 There are no additions or exclusions.

16 *Annex A (normative): Event Types*

17 There are no additions or exclusions.

18 *Annex B (normative): Probable Causes*

19 The following Probable Causes from Table B.3 "Probable Causes from
 20 GSM 12.11" are not applicable to cdma2000:

21

GSM 12.11 Probable Cause	Event Type
A-bis to TRX interface failure	Equipment
Invalid MSU received	Communications
LAPD link protocol failure	Communications

22

23 Definition of cdma2000-specific probable cause values is for further
 24 study.

1 *Annex C (informative): Examples of using notifyChangedAlarm*

2 There are no additions or exclusions.

3 *Annex D (informative): Change history*

4 There are no additions or exclusions.

5 **32.111-3 "Fault Management; Part 3: Alarm Integration Reference Point:
6 CORBA Solution Set (Release 4)"**

7 (see [06])

8 *Chapter 01: Scope*

9 There are no additions or exclusions.

10 *Chapter 02: References*

11 There are no additions or exclusions.

12 *Chapter 03: Definitions and abbreviations*

13 There are no additions or exclusions.

14 *Chapter 04: Architectural Features*

15 There are no additions or exclusions.

16 *Chapter 05: Mapping*

17 There are no additions or exclusions.

18 *Chapter 06: AlarmIRPNotifications Interface*

19 There are no additions or exclusions.

20 *Annex A (normative): IDL specification (file name "AlarmIRPConstDefs.idl")*

21 Regarding the use of Probable Cause please refer to exceptions stated on
22 32.111-2 "Alarm Integration Reference Point: Information Service",
23 Appendix B "Probable Causes".

24 *Annex B (informative): Change history*

25 There are no additions or exclusions.

1 **32.300 “3G Configuration Management (CM); Name convention for**
2 **Managed Objects”**

3 (see [08])

4 **General Exceptions**

5 There are no global additions or exclusions for 3GPP 32.300 [08].

6 **Specific Exceptions**

7 *Chapter 01: Scope*

8 There are no additions or exclusions.

9 *Chapter 02: References*

10 There are no additions or exclusions.

11 *Chapter 03: Definitions and abbreviations*

12 There are no additions or exclusions.

13 *Chapter 04: System Overview*

14 There are no additions or exclusions.

15 *Chapter 05: Name Convention for Managed Objects*

16 There are no additions or exclusions.

17 *Chapter 06: Representations of DN*

18 CMIP Solution Set specification are not applicable for Revision A of this
19 document.

20 *Chapter 07: String Representation of DN*

21 There are no additions or exclusions.

22 *Chapter 08: Examples of DN in string representation*

23 There are no additions or exclusions.

- 1 *Chapter 09: Usage Scenario*
 - 2 There are no additions or exclusions.
- 3 *Annex A (normative): Mapping of RDN AttributeType to Strings*
 - 4 There are no additions or exclusions.
- 5 *Annex B (normative): Rule for MQ Designers regarding AttributeType interpretation*
 - 6 There are no additions or exclusions.
- 7 *Annex C (informative): DN Prefix and Local Distinguished Name (LDN)*
 - 8 There are no additions or exclusions.
- 9 *Annex D (informative): Change history*
 - 10 There are no additions or exclusions.
- 11

1 **32.301/32.302/32.303-series “Notification IRP”**

2 (see [09]-[11])

3 **General Exceptions**

4 There are no global additions or exclusions for 3GPP 32.301 [09], 3GPP 32.302
5 [10] and 3GPP 32.303 [11].

6 **Specific Exceptions**

7 **32.301 "Notification IRP : Requirements (Release 4)"**

8 (see [09])

9 *Chapter 01: Scope*

10 There are no additions or exclusions.

11 *Chapter 02: References*

12 There are no additions or exclusions.

13 *Chapter 03: Definitions and abbreviations*

14 There are no additions or exclusions.

15 *Chapter 04: Notification management functions over Itf-N*

16 With respect to statements within 4.3 “Notification control functions”:
17 CMIP Solution Set specification are not applicable for Revision A of this
18 document.

19 *Annex A (informative): Change history*

20 There are no additions or exclusions.

1 **32.302 "Notification Integration Reference Point: Information Service**
2 **(Release 4)"**

3 (see [10])

4 *Chapter 01: Scope*

5 There are no additions or exclusions.

6 *Chapter 02: References*

7 There are no additions or exclusions.

8 *Chapter 03: Definitions and abbreviations*

9 There are no additions or exclusions.

10 *Chapter 04: System Overview*

11 There are no additions or exclusions.

12 *Chapter 05: Information Object Classes*

13 There are no additions or exclusions.

14 *Chapter 06: Interface Definition*

15 There are no additions or exclusions.

16 *Annex A (informative): Change history*

17 There are no additions or exclusions.

18 **32.303 "Notification Integration Reference Point: CORBA Solution Set**
19 **(Release R4)"**

20 (see [07])

21 *Chapter 01: Scope*

22 There are no additions or exclusions.

23 *Chapter 02: References*

24 There are no additions or exclusions.

25 *Chapter 03: Definitions and abbreviations*

26 There are no additions or exclusions.

- 1 *Chapter 04: Architectural Features*
 - 2 There are no additions or exclusions.
- 3 *Chapter 05: Mapping*
 - 4 There are no additions or exclusions.
- 5 *Chapter 06: IRP Agent's Behaviour*
 - 6 There are no additions or exclusions.
- 7 *Annex A (normative): IDL Specification (file name “ManagedGenericIRPConstDefs.idl”)*
 - 8 There are no additions or exclusions.
- 9 *Annex B (informative): Change history*
 - 10 There are no additions or exclusions.

1 **32.311/32.312-series "Generic IRP"**

2 (see [13]-[14])

3 **General Exceptions**

4 There are no global additions or exclusions for 3GPP 32.311 [13] and 3GPP
5 32.312 [14].

6 **Specific Exceptions**

7 **32.311 "Generic IRP Management; Requirements (Release 4)"**

8 (see [13])

9 *Chapter 01: Scope*

10 There are no additions or exclusions.

11 *Chapter 02: References*

12 There are no additions or exclusions.

13 *Chapter 03: Definitions and abbreviations*

14 There are no additions or exclusions.

15 *Chapter 04: Notification management functions over Itf-N*

16 There are no additions or exclusions.

17 *Annex A (informative): Change history*

18 There are no additions or exclusions.

19 **32.312 " Generic IRP Management; Information Service (Release 4)"**

20 (see [14])

21 *Chapter 01: Scope*

22 There are no additions or exclusions.

- 1 *Chapter 02: References*
2 There are no additions or exclusions.
- 3 *Chapter 03: Definitions and abbreviations*
4 There are no additions or exclusions.
- 5 *Chapter 04: System Overview*
6 There are no additions or exclusions.
- 7 *Chapter 05: Information Object Classes*
8 There are no additions or exclusions.
- 9 *Chapter 06: Interface Definition*
10 There are no additions or exclusions.
- 11 *Annex A (informative): Change history*
12 There are no additions or exclusions.

1 **32.401 “Performance Management (PM); Concept and Requirements”**

2 (see [15])

3 **General Exceptions**

4 The terms UMTS & GSM are not applicable for the cdma2000 family of
5 standards - nevertheless these terms are used in 3GPP 32.401 [15] mostly in
6 the broader sense of “Wireless System”. If not stated otherwise there are no
7 additions or exclusions required.

8 **Specific Exceptions**

9 Chapter 01: Scope

10 References to 32.403 & 52.402 are not applicable for cdma2000 systems

11 Chapter 02: References

12 Reference to 3GPP TS 25.442 is not applicable for cdma2000 systems.

13 References to GSM 12.04 & GSM 12.06 are not applicable for cdma2000
14 systems.

15 Reference to 3GPP TR 32.800 is not applicable for cdma2000 systems.

16 References to 3GPP TS 32.403 & 3GPP TS 52.402 are not applicable for
17 cdma2000 systems.

18 Chapter 03: Definitions and Abbreviations

19 There are no additions or exclusions.

20 Chapter 04: Concept

21 References to 3GPP TS 32.403 & 3GPP TS 52.402 are not applicable for
22 cdma2000 systems.

23 The following clarifications shall apply to definitions made throughout
24 chapter 4:

- 1 ➤ RNC is equivalent to BSC in cdma2000 systems and shall be
2 interpreted as such.
3 ➤ NodeB is equivalent to BTS in cdma2000 systems and shall be
4 interpreted as such.

5 The in chapter 4.4 specified option “Q3 interface specified in the GSM
6 12.xx series of specifications” is not applicable for cdma2000 systems.

7 *Chapter 05: Functional requirements*

8 References to 3GPP TS 32.403 & 3GPP TS 52.402 are not applicable for
9 cdma2000 systems.

10 Reference on TS 25.442 and TR 32.800 in chapter 5.2 (“Basic Functions”)
11 is not applicable for cdma2000 systems. In addition the following
12 clarifications shall apply to definitions made in chapter 5.2:

- 13 ➤ Itf-N is the “Northbound” interface between the Network
14 Management System and the Element Manager/Network Element.
15 ➤ RNC is equivalent to BSC in cdma2000 systems and shall be
16 interpreted as such.
17 ➤ NodeB is equivalent to BTS in cdma2000 systems and shall be
18 interpreted as such.
19 ➤ IubLink is equivalent to Abis in cdma2000 systems and shall be
20 interpreted as such.

21 *Annex A (normative): Measurement Report File Format*

22 References to 3GPP TS 32.403 & 3GPP TS 52.402 are not applicable for
23 cdma2000 systems.

24 *Annex B (normative): Measurement Report File Conventions and Transfer Procedure*

25 Reference on TS 25.442 in chapter B.1.1 (“NE based approach”) is not
26 applicable for cdma2000 systems. In addition the following clarifications
27 shall apply to definitions made in chapter B.1.1:

- 28 ➤ RNC is equivalent to BSC in cdma2000 systems and shall be
29 interpreted as such.
30 ➤ NodeB is equivalent to BTS in cdma2000 systems and shall be
31 interpreted as such.

1 ➤ IubLink is equivalent to Abis in cdma2000 systems and shall be
2 interpreted as such.

3 *Annex C (informative): The table oriented file format structure*

4 Reference to GSM 12.04 is made for clarification purpose only.

5 *Annex D (informative): Change history*

6 There are no additions or exclusions.

7

1 **32.600 “Configuration Management (CM); Concept and High-level**
2 **Requirements”**

3 (see [17])

4 **General Exceptions**

5 The term UMTS is not applicable for the cdma2000 family of standards -
6 nevertheless it is used in 3GPP 32.600 [17] mostly in the broader sense of “3G
7 Wireless System”. If not stated otherwise there are no additions or exclusions
8 required.

9 **Specific Exceptions**

10 *Chapter 01: Scope*

11 There are no additions or exclusions.

12 *Chapter 02: References*

13 There are no additions or exclusions.

14 *Chapter 03: Definitions and abbreviations*

15 There are no additions or exclusions.

16 *Chapter 04: Network configuration management (CM)*

17 There are no additions or exclusions.

18 *Chapter 05: CM service components*

19 There are no additions or exclusions.

20 *Chapter 06: CM functions*

21 There are no additions or exclusions.

22 *Chapter 07: If-N Interface*

23 With respect to statement made in chapter 7.3.1.1 “Real-time forwarding
24 of CM-related event reports”, CMIP Solution Set specification are not
25 applicable for Revision A of this document.

- 1 *Annex A (informative): Change history*
- 2 There are no additions or exclusions.

1 **32.601/32.602/32.603-series “BasicCM IRP”**

2 (see [18]-[20])

3 **General Exceptions**

4 There are no global additions or exclusions for 3GPP 32.601 [18], 3GPP 32.602
5 [19] and 3GPP 32.603 [20].

6 **Specific Exceptions**

7 **32.601 " Basic Configuration Management IRP: Requirements"**

8 (see [18])

9 *Chapter 01: Scope*

10 There are no additions or exclusions.

11 *Chapter 02: References*

12 References to 3GPP TS 32.632, 3GPP TS 32.642 & 3GPP TS 32.652 are
13 not applicable for cdma2000 systems (the 3GPP2 Network Reference
14 Model and network interfaces will apply (see [50] and Annex A-C of this
15 document).

16

17 *Chapter 03: Definitions and abbreviations*

18 There are no additions or exclusions.

19 *Chapter 04: Requirements*

20 References to 3GPP TS 32.632, 3GPP TS 32.642 & 3GPP TS 32.652 are
21 not applicable for cdma2000 systems (the 3GPP2 Network Reference
22 Model and network interfaces will apply (see [50] and Annex A-C of this
23 document).

24 *Annex A (informative): Change history*

25 There are no additions or exclusions.

1 **32.602 "Basic Configuration Management IRP: Information Service"**

2 (see [19])

3 *Chapter 01: Scope*

4 There are no additions or exclusions.

5 *Chapter 02: References*

6 There are no additions or exclusions.

7 *Chapter 03: Definitions and abbreviations*

8 There are no additions or exclusions.

9 *Chapter 04: System Overview*

10 There are no additions or exclusions.

11 *Chapter 05: Modelling Approach*

12 With respect to statement made in chapter 5.1 "IRP Information Service
13 modelling approach", CMIP Solution Set specification are not applicable
14 for Revision A of this document.

15 *Chapter 06: IRP Information Service*

16 There are no additions or exclusions.

17 *Annex A (informative): Notification/Event Types*

18 CMIP Solution Set specification are not applicable for Revision A of this
19 document.

20 *Annex B (informative): Change history*

21 There are no additions or exclusions.

22 **32.603 "Basic Configuration Management IRP: CORBA Solution Set"**

23 (see [20])

24 *Chapter 01: Scope*

25 There are no additions or exclusions.

26 *Chapter 02: References*

27 There are no additions or exclusions.

- 1 *Chapter 03: Definitions and abbreviations*
2 There are no additions or exclusions.
- 3 *Chapter 04: IRP document version number string*
4 There are no additions or exclusions.
- 5 *Chapter 05: Architectural Features*
6 There are no additions or exclusions.
- 7 *Chapter 06: Mapping*
8 There are no additions or exclusions.
- 9 *Chapter 07: Use of OMG StructuredEvent*
10 There are no additions or exclusions.
- 11 *Chapter 08: Rules for NRM extensions*
12 There are no additions or exclusions.
- 13 *Annex A (normative): CORBA IDL Access Protocol*
14 There are no additions or exclusions.
- 15 *Annex B (normative): CORBA IDL Notification Definitions*
16 There are no additions or exclusions.
- 17 *Annex C (informative): Change history*
18 There are no additions or exclusions.

1 **32.611/32.612/32.613/32.615-series “BulkCM IRP”**

2 (see [22]-[24], [26])

3 **General Exceptions**

4 There are no global additions or exclusions for 3GPP 32.611 [22], 3GPP 32.612
5 [23], 3GPP 32.613 [24] and 3GPP 32.615 [26].

6 **Specific Exceptions**

7 **32.611 " Bulk Configuration Management IRP: Requirements"**

8 (see [22])

9 *Chapter 01: Scope*

10 There are no additions or exclusions.

11 *Chapter 02: References*

12 There are no additions or exclusions.

13 *Chapter 03: Definitions and abbreviations*

14 There are no additions or exclusions.

15 *Chapter 04: Bulk CM and Ift-N Interface*

16 It should be noted that CM data are not necessarily restricted to radio
17 network parameters (even though they may not be standardized).

18 For clarification please note that RNC (used in chapter 4.3 “Bulk CM
19 Requirements”) is equivalent to BSC in cdma2000 systems and shall be
20 interpreted as such.

21 *Annex A (informative): Change history*

22 There are no additions or exclusions.

1 **32.612 "Bulk Configuration Management IRP: Information Service"**

2 (see [23])

3 *Chapter 01: Scope*

4 There are no additions or exclusions.

5 *Chapter 02: References*

6 References to 3GPP TS 32.642 & 3GPP TS 32.652 are not applicable for
7 cdma2000 systems (the 3GPP2 Network Reference Model and network
8 interfaces will apply (see [50] and Annex A-C of this document).

9 *Chapter 03: Definitions and abbreviations*

10 There are no additions or exclusions.

11 *Chapter 04: System Overview*

12 There are no additions or exclusions.

13 *Chapter 05: Modelling Approach*

14 There are no additions or exclusions.

15 *Chapter 06: IRP Information Service*

16 References to 3GPP TS 32.642 & 3GPP TS 32.652 within chapter 6.3
17 "Network Resource Model (NRM)" are not applicable for cdma2000
18 systems (the 3GPP2 Network Reference Model and network interfaces will
19 apply (see [50] and Annex A-C of this document).

20 *Chapter 07: State Machine*

21 There are no additions or exclusions.

22 *Chapter 08: Bulk Configuration Data File*

23 There are no additions or exclusions.

24 *Annex A (informative): Scenarios*

25 There are no additions or exclusions.

26 *Annex B (informative): Change history*

27 There are no additions or exclusions.

1 **32.613 " Bulk Configuration Management IRP: CORBA Solution Set"**

2 (see [24])

3 *Chapter 01: Scope*

4 References to 3GPP TS 32.642 & 3GPP TS 32.652 are not applicable for
5 cdma2000 systems (the 3GPP2 Network Reference Model and network
6 interfaces will apply (see [50] and Annex A-C of this document).

7 *Chapter 02: References*

8 References to 3GPP TS 32.642 & 3GPP TS 32.652 are not applicable for
9 cdma2000 systems (the 3GPP2 Network Reference Model and network
10 interfaces will apply (see [50] and Annex A-C of this document).

11 *Chapter 03: Definitions and abbreviations*

12 References to 3GPP TS 32.642 & 3GPP TS 32.652 are not applicable for
13 cdma2000 systems (the 3GPP2 Network Reference Model and network
14 interfaces will apply (see [50] and Annex A-C of this document).

15 *Chapter 04: Mapping*

16 There are no additions or exclusions.

17 *Chapter 05: BulkCMIRPNotifications Interface*

18 There are no additions or exclusions.

19 *Annex A (normative): IDL: BulkCmIRPConstDefs*

20 There are no additions or exclusions.

21 *Annex B (normative): IDL: BulkCmIRPSystem*

22 There are no additions or exclusions.

23 *Annex C (informative): Change history*

24 There are no additions or exclusions.

25 **32.615 " Bulk Configuration Management IRP: XML File Format Definition"**

26 (see [26])

27 *Chapter 01: Scope*

28 There are no additions or exclusions.

1 *Chapter 02: References*

2 References to 3GPP TS 32.642 & 3GPP TS 32.652 are not applicable for
3 cdma2000 systems (the 3GPP2 Network Reference Model and network
4 interfaces will apply (see [50] and Annex A-C of this document).

5 *Chapter 03: Definitions and abbreviations*

6 There are no additions or exclusions.

7 *Chapter 04: Structure and content of configuration data XML files*

8 References to Annex A of 32.615 [26] are for example purposes only (the
9 relevant 3GPP2 definitions are provided within Annex D.1 of
10 specification).

11 References to 3GPP TS 32.642 & 3GPP TS 32.652 as well as NRM IOC's
12 of these specifications are not applicable for cdma2000 systems (the
13 3GPP2 Network Reference Model and network interfaces will apply (see
14 [50] and Annex A-C of this document).

15 *Chapter 05: Structure and content of session log XML files*

16 There are no additions or exclusions.

17 *Annex A (normative): Configuration data file base XML schema*

18 Not applicable for 3GPP2/cdma2000 systems. Instead the definitions
19 provided within Annex D.1 apply.

20 *Annex B (normative): Configuration data file NRM specific XML schemas*

21 Not applicable for 3GPP2/cdma2000 systems. Instead the definitions
22 provided within Annex D.2 apply. A later future version of this document
23 will provide dedicated XML definitions on a per 3GPP2 NRM basis within
24 Annex A.3 (for "3GPP2 Generic Network Resource Model IRP"), Annex B.3
25 (for "3GPP2 Core Network Resource Model IRP"), and Annex C.3 (for
26 "3GPP2 Radio Access Network Resource Model IRP")

27 *Annex C (informative): Configuration data file vendor-specific XML schema example*

28 There are no additions or exclusions.

29 *Annex D (normative): Session log file XML schema*

30 There are no additions or exclusions.

- 1 *Annex C (informative): Change history*
- 2 There are no additions or exclusions.
- 3

1 **32.621/32.622/32.623-series “Generic NRM IRP”**

2 (see [27]-[29]

3 **General Exceptions**

4 There are no global additions or exclusions for 3GPP 32.621 [27], 3GPP 32.622
5 [28] and 3GPP 32.623 [29].

6 **Specific Exceptions**

7 **32.621 " Generic NRM IRP: Requirements"**

8 (see [27])

9 *Chapter 01: Scope*

10 There are no additions or exclusions.

11 *Chapter 02: References*

12 There are no additions or exclusions.

13 *Chapter 03: Definitions and abbreviations*

14 There are no additions or exclusions.

15 *Chapter 04: Requirements*

16 Requirement (2) “The Network Resource Model defined by this IRP shall
17 support management of UMTS-GSM Inter-system handover” is not
18 applicable to cdma2000 systems (Note: this requirement has no impacts
19 on the reuse of the Generic NRM IRP for cdma2000 systems).

20 *Annex A (informative): Change history*

21 There are no additions or exclusions.

1 **32.622 "Generic NRM IRP: Information Service"**

2 (see [28])

3 *Chapter 01: Scope*

4 There are no additions or exclusions.

5 *Chapter 02: References*6 Reference to 3GPP TS 32.642 is not applicable for cdma2000 systems (but
7 also not used throughout the document).8 *Chapter 03: Definitions and abbreviations*

9 There are no additions or exclusions.

10 *Chapter 04: System Overview*

11 There are no additions or exclusions.

12 *Chapter 05: Modelling Approach*

13 There are no additions or exclusions.

14 *Chapter 06: Information Object Class definitions*15 The Release 4 restrictions on SubNetwork cardinality defined within
16 Figure 5 “Generic NRM Containment/Naming and Association diagram”
17 (chapter 6.1.2.1 “Attributes and relationships”) are not applicable for
18 3GPP2/cdma2000-based systems – in addition the following rule shall
19 apply:20 *If the configuration contains several instances of SubNetwork, exactly
21 one SubNetwork instance shall directly or indirectly contain all the
22 other SubNetwork instances.*23 The stated definition of legal values for *managedType* (chapter
24 6.1.5.1, Table 11 “Attributes” as well as 8.2.2.2, Table 17 “Attributes of
25 ManagedElement”) are not applicable for cdma2000 systems – these shall
26 be considered as reserved values only.27 *Chapter 07: Mapping from IOCs to MOCs*

28 There are no additions or exclusions.

29 *Chapter 08: Managed Object Class definitions*

30 There are no additions or exclusions.

1 *Annex A (informative): Change history*
2 There are no additions or exclusions.

3 **32.623 " Generic NRM IRP: CORBA Solution Set"**

4 (see [29])

5 *Chapter 01: Scope*

6 There are no additions or exclusions.

7 *Chapter 02: References*

8 There are no additions or exclusions.

9 *Chapter 03: Definitions and abbreviations*

10 There are no additions or exclusions.

11 *Chapter 04: Architectural features*

12 There are no additions or exclusions.

13 *Chapter 05: Mapping*

14 There are no additions or exclusions.

15 *Chapter 06: New methodology Mapping*

16 There are no additions or exclusions.

17 *Chapter 07: Rules for NRM extensions*

18 There are no additions or exclusions.

19 *Annex A (normative): CORBA IDL, Access Protocol*

20 There are no additions or exclusions.

21 *Annex B (normative): CORBA IDL, NRM Definitions*

22 There are no additions or exclusions.

23 *Annex C (informative): Change history*

24 There are no additions or exclusions.

1 **32.631/32.632/32.633-series “CN Resource IRP” &**
2 **32.641/32.642/32.643-series “UTRAN Resource IRP” &**
3 **32.651/32.652/32.653-series “GERAN Resource IRP”**

4 (see [31]-[33], [35]-[37] and [38]-[40])

5 **General Exceptions**

6 32.631/32.632/32.633-series “CN Resource IRP” ([31]-[33]),
7 32.641/32.642/32.643-series “UTRAN Resource IRP” ([35]-[37]) &
8 32.651/32.652/32.653-series “GERAN Resource IRP” ([38]-[40]) are not
9 applicable for 3GPP2/cdma2000 systems. Instead the following definitions
10 apply (provided within Annex A-C):

- 11 ▪ Annex A “3GPP2 Generic Network Resource Model IRP”
12 ▪ Annex B “3GPP2 Core Network Resource Model IRP”
13 ▪ Annex C “3GPP2 Radio Access Network Resource Model IRP”

1 **Annex A (normative) “3GPP2 Generic Network Resource Model IRP”**

2 This annex defines the 3GPP2 Generic Network Resource Model for wireless
3 systems based on 3GPP2 specifications.

4 **A.1 3GPP2 Generic Network Resource Model IRP (IS)**

5 Within this section the Information Service (IS) level definitions for the 3GPP2
6 Generic Network Resource Model are specified.

7 This model is defined following the IRP IS methodology specified in 3GPP TS
8 32.102 [03].

9 **A.1.1 Information entities imported and local labels**

10

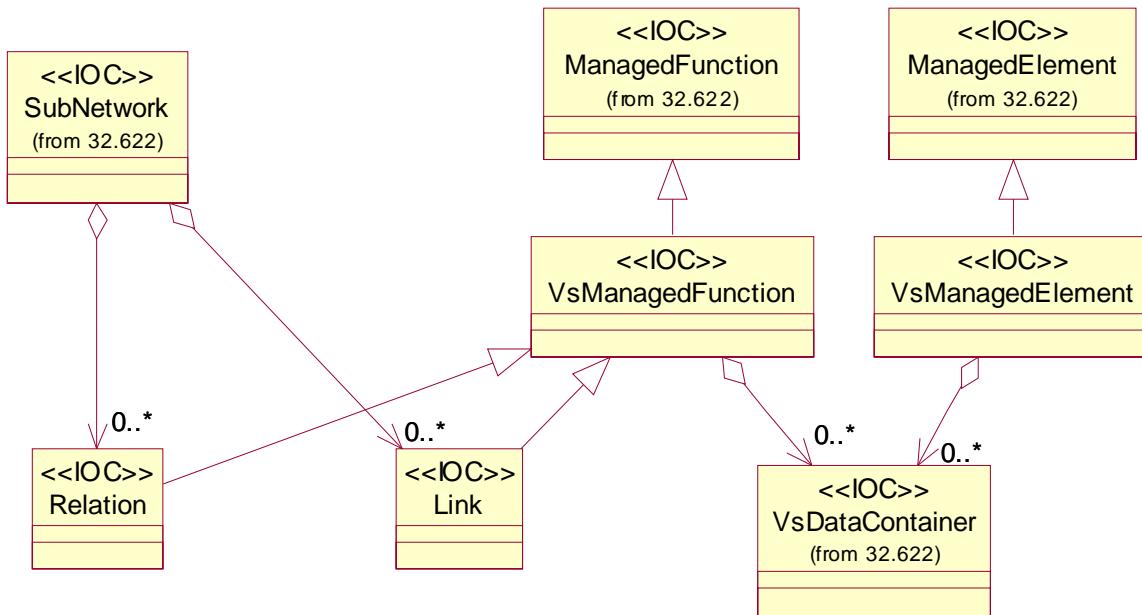

Label reference	Local label
3GPP TS 32.622 [28], information object class, ManagedElement	ManagedElement
3GPP TS 32.622 [28], information object class, ManagedFunction	ManagedFunction
3GPP TS 32.622 [28], information object class, SubNetwork	SubNetwork
3GPP TS 32.622 [28], information object class, VsDataContainer	VsDataContainer

11

1 **A.1.2 Class diagram**

2 **A.1.2.1 Attributes, relationships and inheritance**

3 Figure A-1 shows the containment/naming, association and inheritance
 4 diagram for the 3GPP2 Generic Network:

5
 6 Figure A-1: 3GPP2 Generic Network NRM Containment/Naming, Association and Inheritance

7 **A.1.3 Information object classes definition**

8 **A.1.3.1 IOC Link**

9 **A.1.3.1.1 Definition**

10 This IOC represents the relationship between two instances.
 11 It is derived from VsManagedFunction.

12

1 **A.1.3.1.2 Attributes**

2

Attribute name	Defined in	Visibility	Support Qualifier	Read Qualifier	Write Qualifier
linkId	--	+	M	M	--
objectClass	Top	+ _{inherited}	M _{inherited}	M _{inherited}	-- _{inherited}
objectInstance	Top	+ _{inherited}	M _{inherited}	M _{inherited}	-- _{inherited}
userLabel	ManagedFunction	+ _{inherited}	M _{inherited}	M _{inherited}	-- _{inherited}
protocolName	--	+	O	M	--
protocolVersion	--	+	O	M	--
aEnd	--	+	M	M	--
zEnd	--	+	M	M	--

3

4 **A.1.3.2 IOC Relation**

5 **A.1.3.2.1 Definition**

6 This IOC represents the relationship between two instances. It is derived from
7 the vsManagedFunction.

8 **A.1.3.2.2 Attributes**

9

Attribute name	Defined in	Visibility	Support Qualifier	Read Qualifier	Write Qualifier
relationId	--	+	M	M	--
objectClass	Top	+ _{inherited}	M _{inherited}	M _{inherited}	-- _{inherited}
objectInstance	Top	+ _{inherited}	M _{inherited}	M _{inherited}	-- _{inherited}
userLabel	ManagedFunction	+ _{inherited}	M _{inherited}	M _{inherited}	-- _{inherited}
aEnd	--	+	M	M	--
zEnd	--	+	M	M	--

10

1 **A.1.3.3 IOC VsManagedFunction**2 **A.1.3.3.1 Definition**

3 This IOC represents VsManagedFunction class. It inherits from
 4 ManagedFunction.

5 **A.1.3.3.2 Attributes**

6 All attributes are inherited from ManagedFunction.
 7

8 **A.1.3.4 IOC VsManagedElement**9 **A.1.3.4.1 Definition**

10 This IOC represents VsManagedElement class. It inherits from
 11 ManagedElement.

12 **A.1.3.4.2 Attributes**

13 All attributes are inherited from ManagedElement.

14 **A.1.4 Information attributes definition**15 **A.1.4.1 Definition and legal values**

16

Attribute Name	Definition	Legal Values
aEnd	The value of this attribute shall be the DN of the instance to which this link/relation is connected.	--
linkId	It contains 'name+value' that is the RDN, when naming an instance, of this object class containing this attribute. This RDN uniquely identifies the object instance within the scope of its containing (parent) object instance.	--
objectClass	As defined in 32.622 [28]: An attribute which captures the name of the class from which the object instance is an occurrence of.	--
objectInstance	As defined in 32.622 [28]: An information which captures the Distinguished Name of any object.	--

Attribute Name	Definition	Legal Values
relationId	It contains 'name+value' that is the RDN, when naming an instance, of this object class containing this attribute. This RDN uniquely identifies the object instance within the scope of its containing (parent) object instance.	--
protocolName	Protocol name.	--
protocolVersion	Protocol version.	--
userLabel	Based on definition from 32.622 [28]: A user-friendly (and user assigned) name of the associated instance.	--
zEnd	The value of this attribute shall be the DN of the instance to which this link/relation is connected.	--

1

2 **A.2 3GPP2 Generic Network Resource Model (CORBA SS)**

3 Within this section the CORBA Solution Set (SS) definitions for the 3GPP2
 4 Generic Network Resource Model are specified.

5 **A.2.1 Architectural features**

6 The overall architectural feature of 3GPP2 Generic Network Resource Model IRP
 7 (IS) is specified in section Annex A.1 within this document.
 8 This clause specifies features that are specific to the CORBA SS.

9 **A.2.1.1 Notifications**

10 Notifications are sent according to the Notification IRP: CORBA SS (see
 11 3GPP TS 32.303 [11])

12 **A.2.2 Mapping**

13 **A.2.2.1 General mappings**

14 The IS parameter name managedObjectInstance is mapped into DN.
 15 Attributes modeling associations as defined in the NRM (here also called
 16 "reference attributes") are in this SS mapped to attributes. The names of the
 17 reference attributes in the NRM are mapped to the corresponding attribute
 18 names in the IOC. When the cardinality for an association is 0..1 or 1..1 the
 19 data type for the reference attribute is defined as an MOReference. The value of

1 an MO reference contains the distinguished name of the associated MO. When
 2 the cardinality for an association allows more than one referred MO, the
 3 reference attribute will be of type MOReferenceSet, which contains a sequence
 4 of MO references.

5 If a reference attribute is changed, an AttributeValueChange notification is
 6 emitted.

7 **A.2.2.2 3GPP2 Generic Network NRM Information Object Class (IOC)**
 8 **mapping**

9 **A.2.2.2.1 IOC Link**

10

NRM Attributes of IOC Link	SS Attributes	SS Type	Qualifier	Read	Write
linkId	linkId	string	M	M	--
objectClass	objectClass	Defined in Top	inherited	inherited	inherited
objectInstance	objectInstance	Defined in Top	inherited	inherited	inherited
userLabel	userLabel	Defined in ManagedFunction	inherited	inherited	inherited
protocolName	protocolName	string	O	M	--
protocolVersion	protocolVersion	string	O	M	--
aEnd	aEnd	string	M	M	--
zEnd	zEnd	string	M	M	--

11

12 **A.2.2.2.2 IOC Relation**

13

NRM Attributes of IOC Relation	SS Attributes	SS Type	Qualifier	Read	Write
relationId	relationId	string	M	M	--
objectClass	objectClass	Defined in Top	inherited	inherited	inherited
objectInstance	objectInstance	Defined in Top	inherited	inherited	inherited
userLabel	userLabel	Defined in ManagedFunction	inherited	inherited	inherited
aEnd	aEnd	string	M	M	--
zEnd	zEnd	string	M	M	--

14

1 **A.3 3GPP2 Generic Network Resource Model (XML SS)**

2 Within this section the XML Solution Set (SS) definitions for the 3GPP2 Generic
3 Network Resource Model will be specified in a future version of this document
4 (currently defined within Annex D).

5

1 **Annex B (normative) “3GPP2 Core Network Resource Model IRP”**

2 This annex defines the 3GPP2 Core Network Resources Model for wireless
 3 systems based on 3GPP2 specifications.

4 It is mainly based on the following documents:

- 5 ▪ *3GPP2 S.R0005-B* [50]: This document defines the wireless network
 6 reference model depicting circuit-mode and packet-mode operations that
 7 include network entities and reference points.
- 8 ▪ 3GPP2 S.R0037 [51]: This document defines the All IP Network
 9 Architecture Model for cdma2000 Spread Spectrum Systems.

10 **B.1 3GPP2 Core Network Resource Model IRP (IS)**

11 Within this section the Information Service (IS) level definitions for the 3GPP2
 12 Core Network Resource Model are specified.

13 This model is defined following the IRP IS methodology specified in 3GPP TS
 14 32.102 [03].

15 **B.2.1 Information entities imported and local labels**

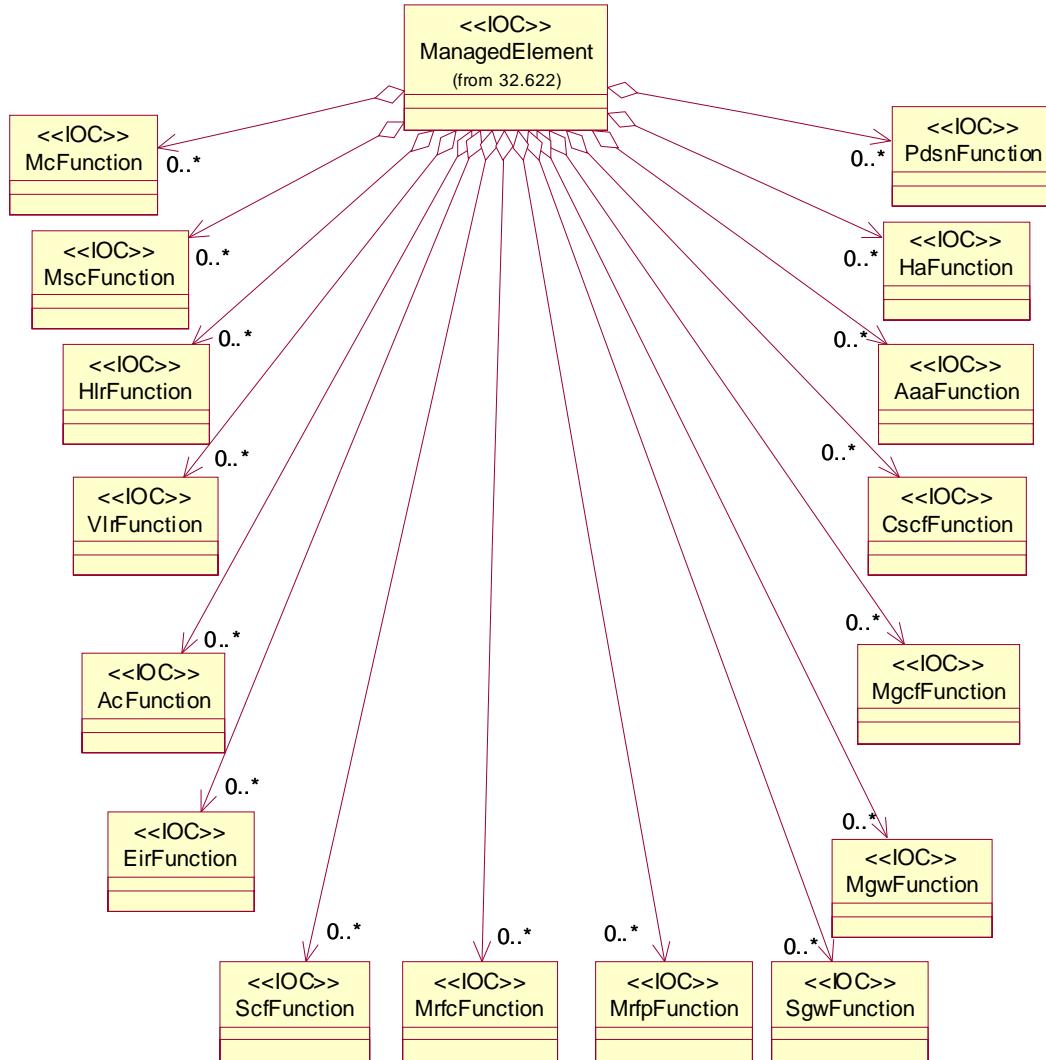

Label reference	Local label
32.622 [28], information object class, ManagedElement	ManagedElement
Annex A, information object class, VsManagedFunction	VsManagedFunction
Annex A, information object class, Link	Link
Annex C, information object class, ALink	ALink
Annex C, information object class, AquaterLink	AquaterLink

17

1 **B.2.2 Class diagram**

2 **B.1.2.1 Attributes and relationships**

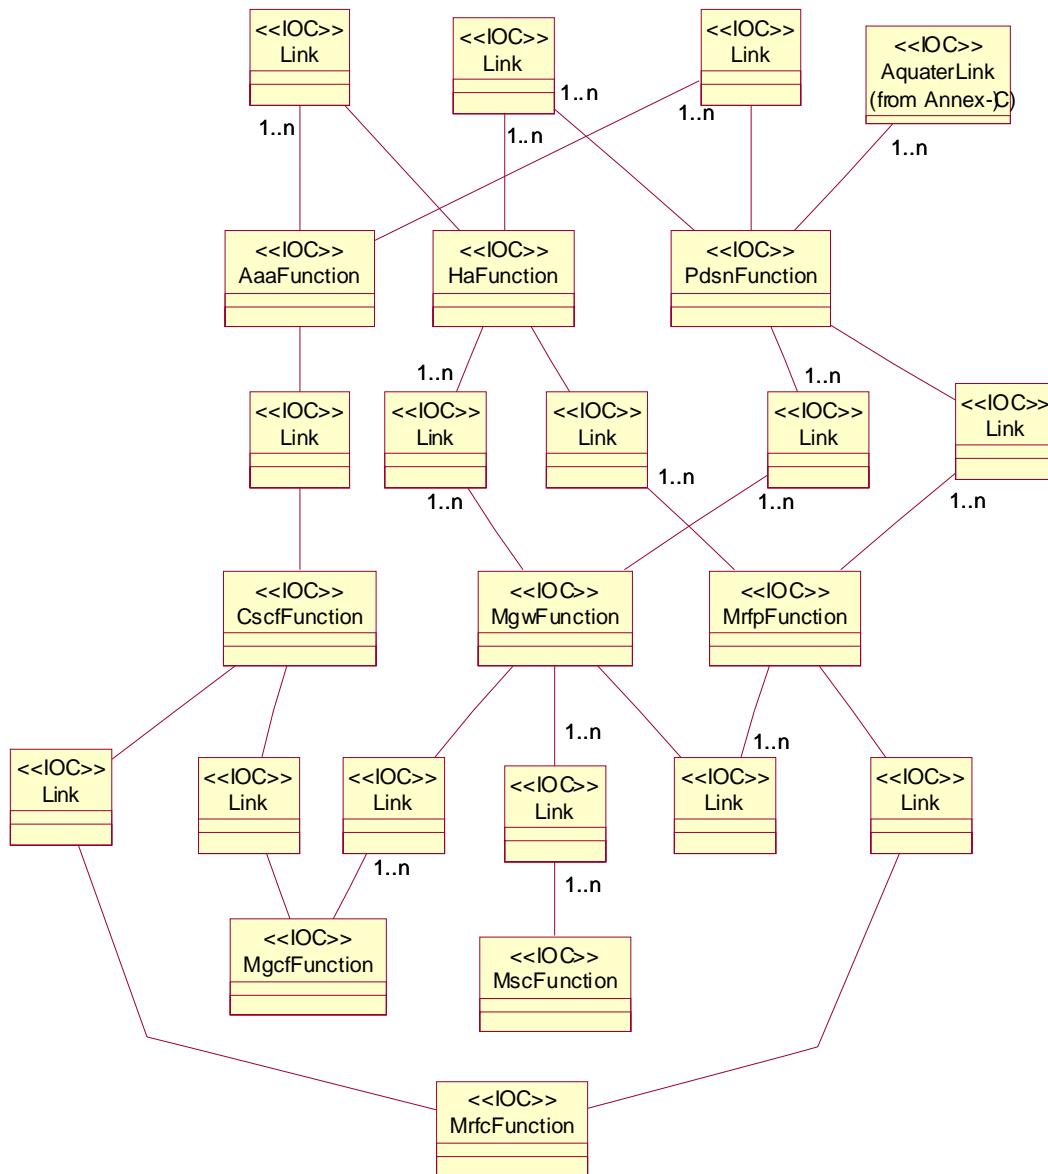

3 Figure B-1 shows the containment/naming hierarchy of the 3GPP2 Core
4 Network NRM.

16

1 **B.1.3.17 IOC `clink`**2 **B.1.3.17.1 Definition**

3 This IOC represents the C link functionality between MSC and HLR. For more
 4 information, see [50].

5 It is derived from `Link`.

6 **B.1.3.17.2 Attributes**

7 All attributes are inherited from `Link`.

8 **B.1.3.18 IOC `elink`**9 **B.1.3.18.1 Definition**

10 This IOC represents the E link functionality between MSCs. For more
 information, see [50].

12 It is derived from `Link`.

13 **B.1.3.18.2 Attributes**

14 All attributes are inherited from `Link`.

15 **B.2.4 Information attributes definition**16 **B.1.4.1 Definition and legal values**

17

Attribute Name	Definition	Legal Values
<code>aaaFunctionId</code>	It contains 'name+value' that is the RDN, when naming an instance, of this object class containing this attribute. This RDN uniquely identifies the object instance within the scope of its containing (parent) object instance.	--
<code>acFunctionId</code>		--
<code>cscfFunctionId</code>		--
<code>eirFunctionId</code>		--
<code>haFunctionId</code>		--
<code>hlrFunctionId</code>		--
<code>linkId</code>		--
<code>mcFunctionId</code>		--
<code>mgcfFunctionId</code>		--

mgwFunctionId		--
mrfcFunctionId		--
mrfpFunctionId		--
mscFunctionId		--
pdsnFunctionId		--
scfFunctionId		--
vlrFunctionId		--
aaaFunction-cscfFunction-link	The value shall be the DN of the related link instance.	--
aaaFunction-haFunctionlink-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one HaFunction instance.	--
aaaFunction-pdsnFunction-link-list	The value shall be the related link instance DNs. Each link instance is related to one PdsnFunction instance.	--
aEnd	The value of this attribute shall be the DN of the instance to which this link/relation is connected.	--
cscfFunction-aaaFunction-link	The value shall be the DN of the related Link instance.	--
cscfFunction-mgcfFunction-link	The value shall be the DN of the related Link instance.	--
cscfFunction-mrfcFunction-link	The value shall be the DN of the related Link instance.	--
haFunction-aaaFunction-link	The value of this attribute shall be the DN of the related link instance.	--
haFunction-mgwFunction-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one MgwFunction instance.	--
haFunction-mrfpFunction-link	The value shall be the DN of the related link instance.	--
haFunction-pdsnFunction-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one PdsnFunction instance.	--
hlrFunction-cLink-list	The value shall be the list of the related CLink instance DNs.	--
mgcfFunction-cscfFunction-link	The value shall be the DN of the related Link instance.	--
mgcfFunction-mgwFunction-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one MgwFunction instance.	--
mgwFunction-haFunction-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one HaFunction instance.	--

mgwFunction-mgcfFunction-link	The value shall be the DN of the related Link instance.	--
mgwFunction-mrfpFunction-link	The value shall be the DN of the related Link instance.	--
mgwFunction-mscFunction-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one MscFunction instance.	--
mgwFunction-pdsnFunction-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one PdsnFunction instance.	--
mrfcFunction-cscfFunction-link	The value shall be the DN of the related Link instance.	--
mrfcFunction-mrfpFunction-link	The value shall be the DN of the related Link instance.	--
mrfpFunction-haFunction-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one HaFunction instance.	--
mrfpFunction-mgwFunction-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one MgwFunction instance.	--
mrfpFunction-mrfcFunction-link	The value shall be the DN of the related Link instance.	--
mrfpFunction-pdsnFunction-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one PdsnFunction instance.	--
mscFunction-aLink-list	The value shall be the list of the related ALink instance DNs.	--
mscFunction-cLink	The value shall be the DN of the related CLink instance.	--
mscFunction-eLink-list	The value shall be the list of the related ELink instance DNs.	--
mscFunction-mgwfunction-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one MgwFunction instance.	--
objectClass	As defined in 32.622 [28]: An attribute which captures the name of the class from which the object instance is an occurrence of.	--
objectInstance	As defined in 32.622 [28]: An information which captures the Distinguished Name of any object.	--
pdsnFunction-aaaFunction-link	The value of this attribute shall be the DN of the related link instance.	--
pdsnFunction-aquaterLink-list	The value shall be the list of the related AquaterLink instance DNs.	--

pdsnFunction-haFunction-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one HaFunction instance.	--
pdsnFunction-mgwFunction-link-list	The value shall be the list of the related link instance DNs. Each link instance is related to one MgwFunction instance.	--
pdsnFunction-mrfpFunction-link	The value shall be the DN of the related link instance.	--
protocolName	Protocol name	--
protocolVersion	Protocol version	--
userLabel	Based on definition from 32.622 [28]: A user-friendly (and user assigned) name of the associated instance.	--
zEnd	The value of this attribute shall be the DN of the instance to which this link/relation is connected.	--

1 **B.2 3GPP2 Core Network Resource Model (CORBA SS)**

2 Within this section the CORBA Solution Set (SS) definitions for the 3GPP2 Core
3 Network Resource Model are specified.

4 **B.2.1 Architectural features**

5 The overall architectural feature of 3GPP2 Core Network Resource Model IRP
6 (IS) is specified in section Annex B.1 within this document.

7 This clause specifies features that are specific to the CORBA SS.

8 **B.2.1.1 Notifications**

9 Notifications are sent according to the Notification IRP: CORBA SS (see
10 3GPP TS 32.303 [11])

11 **B.2.2 Mapping**

12 **B.2.2.1 General mappings**

13 The IS parameter name managedObjectInstance is mapped into DN.

14 Attributes modeling associations as defined in the NRM (here also called
15 “reference attributes”) are in this SS mapped to attributes. The names of the
16 reference attributes in the NRM are mapped to the corresponding attribute
17 names in the IOC. When the cardinality for an association is 0..1 or 1..1 the
18 data type for the reference attribute is defined as an MOReference. The value of
19 an MO reference contains the distinguished name of the associated MO. When
20 the cardinality for an association allows more than one referred MO, the
21 reference attribute will be of type MOReferenceSet, which contains a sequence
22 of MO references.

23 If a reference attribute is changed, an AttributeValueChange notification is
24 emitted.

1 **B.2.2.2 3GPP2 Core Network NRM Information Object Class (IOC) mapping**

2 **B.2.2.2.1 IOC `mscFunction`**

3

NRM Attributes of IOC <code>mscFunction</code>	SS Attributes	SS Type	Qualifier	Read	Write

1 B.3 3GPP2 Core Network Resource Model (XML SS)

2 Within this section the XML Solution Set (SS) definitions for the 3GPP2 Core
3 Network Resource Model will be specified in a future version of this document
4 (currently defined within Annex D).

5

1 **Annex C (normative) “3GPP2 Radio Access Network Resource Model IRP”**

2 This annex defines the 3GPP2 Radio Access Network Model for wireless systems
 3 based on 3GPP2 specifications.

4 It is mainly based on the following documents:

- 5 ▪ *3GPP2 S.R0005-B* [50]: This document defines the wireless network
 6 reference model depicting circuit-mode and packet-mode operations that
 7 include network entities and reference points.
- 8 ▪ *3GPP2 S.R0037* [51]: This document defines the All IP Network
 9 Architecture Model for cdma2000 Spread Spectrum Systems.

10 **C.1 3GPP2 Radio Access Network Resource Model IRP (IS)**

11 Within this section the Information Service (IS) level definitions for the 3GPP2
 12 Radio Access Network Resource Model are specified.

13 This model is defined following the IRP IS methodology specified in 3GPP TS
 14 32.102 [03].

15 **C.1.1 Information entities imported and local labels**

16

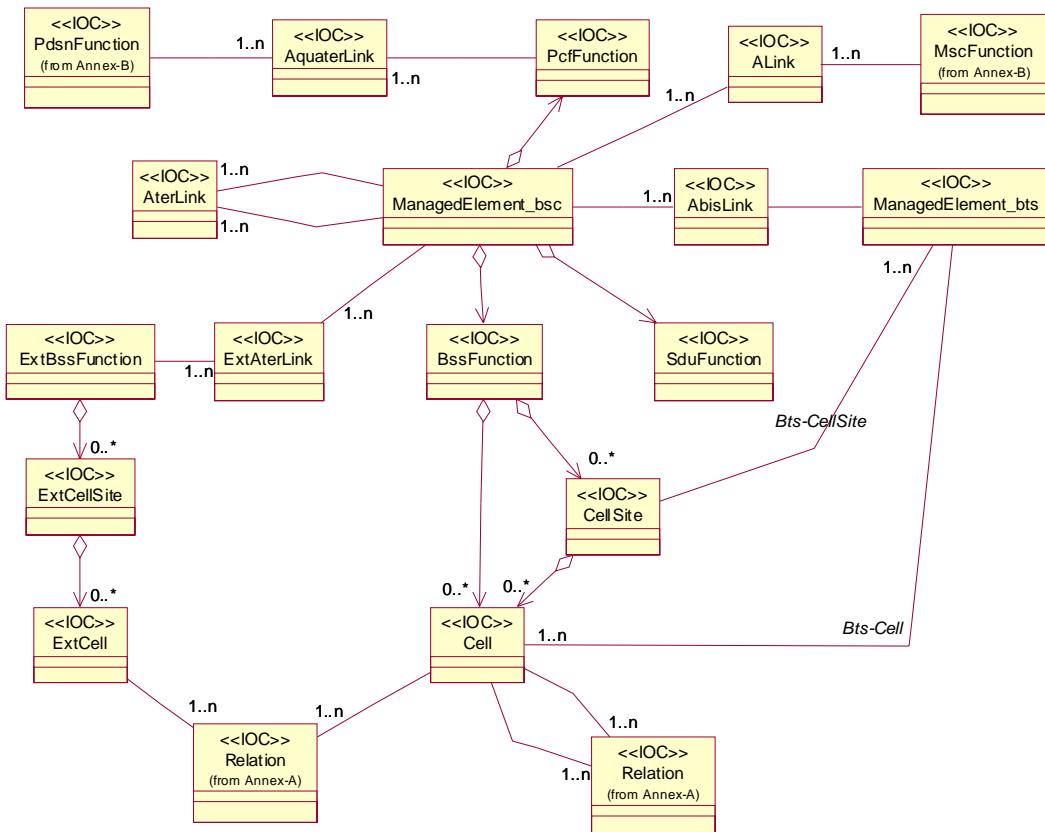

Label reference	Local label
32.622 [28], information object class, ManagedElement	ManagedElement
32.622 [28], information object class, Top	Top
Annex A, information object class, VsManagedFunction	VsManagedFunction
Annex A, information object class, VsManagedElement	VsManagedElement
Annex A, information object class, Link	Link
Annex A, information object class, Relation	Relation

17

cell-extCell-relation-list	--	+	O	M	--
cell- managedElement_bts	--	+	O	M	--

1

2 C.1.3.7 IOC ExtCell

3 C.1.3.7.1 Definition

4 This IOC represents an external Cell.

5 C.1.3.7.2 Attributes

6

Attribute name	Defined in	Visibility	Support Qualifier	Read Qualifier	Write Qualifier
extCellId	--	+	M	M	--
objectClass	Top	+ ^{inherited}	M ^{inherited}	M ^{inherited}	-- ^{inherited}
objectInstance	Top	+ ^{inherited}	M ^{inherited}	M ^{inherited}	-- ^{inherited}
extCell-cell-relation-list	--	+	O	M	--

7

8 C.1.3.8 IOC ExtCellSite

9 C.1.3.8.1 Definition

10 This IOC represents the external site.

11 C.1.3.8.2 Attributes

12

Attribute name	Defined in	Visibility	Support Qualifier	Read Qualifier	Write Qualifier
extCellSiteId	--	+	M	M	--
objectClass	Top	+ ^{inherited}	M ^{inherited}	M ^{inherited}	-- ^{inherited}
objectInstance	Top	+ ^{inherited}	M ^{inherited}	M ^{inherited}	-- ^{inherited}

1

2 **C.1.3.9 IOC AquaterLink**3 **C.1.3.9.1 Definition**4 This IOC represents the RP link between the BSC and the PDSN. For more
5 information, see [50].

6 It inherits from Link.

7 **C.1.3.9.2 Attributes**

8 All attributes are inherited from Link.

9 **C.1.3.10 IOC ALink**10 **C.1.3.10.1 Definition**11 This IOC represents the A link between the BSC and the MSC. For more
12 information, see [50].

13 It inherits from Link.

14 **C.1.3.10.2 Attributes**

15 All attributes are inherited from Link.

16 **C.1.3.10.3 Constraints**

17 This IOC is not applicable to PcfFunction.

1 **C.1.3.11 IOC AbisLink**

2 **C.1.3.11.1 Definition**

3 This IOC represents the Abis link between the BSC and the BTS. For more
4 information, see [50].

5 It inherits from Link.

6 **C.1.3.11.2 Attributes**

7 All attributes are inherited from Link.

8 **C.1.3.11.3 Constraints**

9 This IOC is not applicable to PcfFunction.

10 **C.1.3.12 IOC AterLink**

11 **C.1.3.12.1 Definition**

12 This IOC represents the Ater link between BSSs. For more information, see [50].

13 It inherits from Link.

14 **C.1.3.12.2 Attributes**

15 All attributes are inherited from Link.

16 **C.1.3.12.3 Constraints**

17 This IOC is not applicable to PcfFunction.

18 **C.1.3.13 IOC ExtAterLink**

19 **C.1.3.13.1 Definition**

20 This IOC represents the Ater link between a BSS and an external BSS. For more
21 information, see [50].

22 It inherits from Link.

1 **C.1.3.13.2 Attributes**

2 All attributes are inherited from Link.

3 **C.1.3.13.3 Constraints**

4 This IOC is not applicable to PcfFunction.

5 **C.1.3.14 IOC PcfFunction**6 **C.1.3.14.1 Definition**

7 This IOC represents the PCF functionality. For more information, see [50].

8 It is derived from VsManagedFunction.

9 **C.1.3.14.2 Attributes**

10

Attribute name	Defined in	Visibility	Support Qualifier	Read Qualifier	Write Qualifier
pcfFunctionId	--	+	M	M	--
objectClass	Top	+inherited	M ^{inherited}	M ^{inherited}	-- ^{inherited}
objectInstance	Top	+inherited	M ^{inherited}	M ^{inherited}	-- ^{inherited}
userLabel	ManagedFunction	+inherited	M ^{inherited}	M ^{inherited}	-- ^{inherited}
pcfFunction-aterLink-list	--	+	O	M	--

11

12 **C.1.3.15 IOC sduFunction**13 **C.1.3.15.1 Definition**

14 This IOC represents the SDU functionality.

15 It is derived from VsManagedFunction.

16 **C.1.3.15.2 Attributes**

17

Attribute name	Defined in	Visibility	Support Qualifier	Read Qualifier	Write Qualifier
sduFunctionId	--	+	M	M	--
objectClass	Top	+ ^{inherited}	M ^{inherited}	M ^{inherited}	-- ^{inherited}
objectInstance	Top	+ ^{inherited}	M ^{inherited}	M ^{inherited}	-- ^{inherited}
userLabel	ManagedFunction	+ ^{inherited}	M ^{inherited}	M ^{inherited}	-- ^{inherited}

1

2 **C.1.4 Information relationships definition**3 **C.1.4.1 Bts-CellSite**4 **C.1.4.1.1 Definition**

5 This represents a bi-directional relation between the Bts and CellSite. The role
 6 of the IOC shall be mapped to a reference attribute of the IOC. The name of the
 7 reference attribute shall be the role name.

8 **C.6.1.4.1.2 Roles**

Name
ManagedElement_bts-cellSite
cellsite- managedElement_bts

9

10 **C.1.4.1.3 Constraints**

11 The Relation Bts-CellSite is only instantiated when BssFunction has
 12 containment with CellSite.

13 **C.1.4.2 Bts-Cell**14 **C.1.4.2.1 Definition**

15 This represents a bi-directional relation between the Bts and Cell. The role of
 16 the IOC shall be mapped to a reference attribute of the IOC. The name of the
 17 reference attribute shall be the role name.

1 **C.1.4.2.2 Roles**

Name
managedElement_bts-cell
cell- managedElement_bts

2

3 **C.1.4.2.3 Constraints**

4 The Relation Bts-Cell is only instantiated when BssFunction has containment
5 with Cell.

6 **C.1.5 Information attributes definition**

7 **C.1.5.1 Definition and legal values**

8

Attribute Name	Definition	Legal Values
bssFunctionId		--
cellId		--
extBssId		--
extCellId		--
extCellSiteId		--
managedElementId		--
pcfFunctionId		--
sduFunctionId		--
cell-cell-relation-list	The value shall be the list of the related Cell instance DNs	--
cell-extCell-relation-list	The value shall be the list of the related ExtCell instance DNs	--
cellSite- managedElement_bts	The value shall be the DN of the related BTS instance. This is a reference attribute modelling the role that this CellSite is connected to BTS.	--
dnPrefix	As defined in 32.622 [28]: It carries the DN Prefix information as defined in Annex C of 32.300 [08]. It shall only be specified if the instance of the information object class supporting this attribute is a local root instance of the MIB. Otherwise the value shall carry the NULL semantics.	--
extBss-extAterLink-list	The value shall be the list of the related ExtAterLink instance DNs	--

Attribute Name	Definition	Legal Values
locationName	As defined in 32.622 [28]: The physical location of this entity (e.g. an address).	--
managedBy	Based on definition from 32.622 [28]: Refers to the DN of the related managementNode instance. This is a reference attribute modelling the role (of the association MgmtAssociation) that this ME is managed by zero or one managementNode.	--
managedElement_bsc-aterLink-list	The value shall be the list of the related AterLink instance DNs	--
managedElement_bsc-aLink-list	The value shall be the list of the related ALink instance DNs	--
managedElement_bsc-abisLink-list	The value shall be the list of the related AbisLink instance DNs	--
managedElement_bsc-extAterLink-list	The value shall be the list of the related ExtAterLink instance DNs.	--
managedElement_bts-abisLink	The value of this attribute shall be the DN of the related AbisLink instance.	--
managedElement_bts-cellSite	The value shall be the DN of the related CellSite instance. This is a reference attribute modelling the role that this BTS is connected to CellSite.	--
managedElementType	Based on definition from 32.622 [28]: The type of managed element. It is a multi-valued attribute with one or more elements. Thus, it may represent one ME functionality, e.g. an BSC, or a combination of more than one functionality e.g. an MSC/HLR. The actual syntax and encoding of this attribute is Solution Set specific	<p><i>3GPP/3GPP2 reserved values:</i> MSC, HLR, VLR, EIR, IWF, MGW, SCF</p> <p><i>3GPP reserved values:</i> RNC, NodeB, AuC, SMS-IWMSC, SMS-GMSC, GMSC, SGSN, GGSN, BG, BS, CBC, CGF, GMLC, GMSC Server, MNP-SRF, MSC Server, NPDB, R-SGW, SMLC, SRF, SSF</p> <p><i>3GPP2 reserved values:</i> BSC, BTS, AAA, AC, CSCF, HA, MC, MGCF, MRFC, MRFP, PDSN</p>
mcc	Mobile Country Code, MCC. It is a part of the PLMN Id.	--
mnc	Mobile Network Code, MNC. It is a part of the PLMN Id	--
objectClass	As defined in 32.622 [28]: An attribute which captures the name of the class from which the object instance is an occurrence of.	--

Attribute Name	Definition	Legal Values
objectInstance	As defined in 32.622 [28]: An information which captures the Distinguished Name of any object.	--
pcfFunction-aterLink-list	The value shall be the DN of the related AterLink instance. This is a reference attribute modelling the role that this PcfFunction is connected to AterLink.	--
swVersion	As defined in 32.622 [28]: The software version of the ManagementNode or ManagedElement (this is used for determining which version of the vendor specific information is valid for the ManagementNode or ManagedElement).	--
userDefinedState	As defined in 32.622 [28]: An operator defined state for operator specific usage.	--
userLabel	Based on definition from 32.622 [28]: A user-friendly (and user assigned) name of the associated instance.	--
vendorName	As defined in 32.622 [28]: The name of the vendor.	--

1 **C.2 3GPP2 Radio Access Network Resource Model (CORBA SS)**

2 Within this section the CORBA Solution Set (SS) definitions for the 3GPP2 Radio
3 Access Network Resource Model are specified.

4 **C.2.1 Architectural features**

5 The overall architectural feature of 3GPP2 Radio Access Network Resource
6 Model IRP (IS) is specified in section Annex C.1 within this document.

7 This clause specifies features that are specific to the CORBA SS.

8 **C.2.1.1 Notifications**

9 Notifications are sent according to the Notification IRP: CORBA SS (see
10 3GPP TS 32.303 [11]).

11 **C.2.2 Mapping**

12 **C.2.2.1 General mappings**

13 The IS parameter name managedObjectInstance is mapped into DN.

14 Attributes modeling associations as defined in the NRM (here also called
15 “reference attributes”) are in this SS mapped to attributes. The names of the
16 reference attributes in the NRM are mapped to the corresponding attribute
17 names in the IOC. When the cardinality for an association is 0..1 or 1..1 the
18 data type for the reference attribute is defined as an MOReference. The value of
19 an MO reference contains the distinguished name of the associated MO. When
20 the cardinality for an association allows more than one referred MO, the
21 reference attribute will be of type MOReferenceSet, which contains a sequence
22 of MO references.

23 If a reference attribute is changed, an AttributeValueChange notification is
24 emitted.

1 C.3 3GPP2 Radio Access Network Resource Model (XML SS)

2 Within this section the XML Solution Set (SS) definitions for the 3GPP2 Radio
3 Access Network Resource Model will be specified in a future version of this
4 document (currently defined within Annex D).

5

1 **Annex D (normative) “3GPP2 BulkCM IRP XML Solution Set”**

2 This annex defines the 3GPP2 BulkCM IRP XML Solution Set for wireless
 3 systems based on 3GPP2 specifications.

4 **D.1 3GPP2 Configuration data file base XML schema**

5 The following XML schema PP2BulkCM.xsd is the base schema for 3GPP2
 6 configuration data XML files:

```

7
8 <?xml version="1.0" encoding="UTF-8" ?>
9 <!--
10 3GPP2 S.S0028-A Bulk CM IRP Configuration data file base XML
11  schema PP2BulkCM.xsd
12  -->

1 **D.2 3GPP2 Configuration data file NRM specific XML schemas**

2 The XML schemas within this section are the 3GPP2 NRM specific schemas for
 3 configuration data XML files.

4 The following XML schema PP2GenericNRM.xsd is the NRM specific schema for
 5 the 3GPP2 Generic NRM defined in Annex A within this specification, which is
 6 based on the 3GPP Generic NRM as defined in TS 32.622 [28]:

```

9   <?xml version="1.0" encoding="UTF-8" ?>

23  <xs:complexType name="XmlNrmSolutionSetNodeType">
24      <xs:annotation>
25          <xs:documentation>This type supports the generic concept of
26              node within a network/subnetwork. Within TS 32.622,
27              ManagedElement and ManagedNode both define attributes
28              vendorName, userDefinedState, locationName and
29              swVersion; these attributes share a common description.
30              Both IOCs are subclasses of the same ICO; the UML modelers
31              missed an abstraction when producing the TS 32.622 UML.
32              This entity is added to the XML solution set type repertoire to
33              ensure the well-formedness of the XML. The name reflects
34              the fact that this entity was added to the XML NRM Solution
35              Set and is not part of the GenericNRM
36              model(s).</xs:documentation>

1 **Annex E (informative) “Terminology”**

2 This Annex provides a mapping between UMTS and cdma2000 terminology for
3 clarification purpose.

4

3GPP/UMTS	3GPP2/cdma2000
Radio Network Controller (RNC)	Base Station Controller (BSC)
Node B	Base Transceiver System (BTS)
Iub (Interface between RNC and Node B)	A _{bis} (Interface between BSC and BTS)
Itf-N (“Northbound” Interface)	Reference Point O (see [50])
Authentication Centre (AuC)	Authentication Center (AC)
Equipment Identity Register (EIR)	Equipment Identity Register (EIR)
Home Location Register (HLR)	Home Location Register (HLR)
Mobile-services Switching Centre (MSC) / Gateway MSC (GMSC)	Mobile Switching Center (MSC)
SMS Gateway MSC (SMS-GMSC) / SMS Interworking MSC	Similar in functionality to Message Center (MC)
Visitor Location Register (VLR)	Visitor Location Register (VLR)
Home Subscriber Server (HSS)	Databases (<i>within All-IP NAM</i>)

5

1 **Annex F (informative) “Integration Reference Points - IRPs”**

2 This Annex is provided for background information purposes only and has no
3 impact on the completeness of this specification.

4 The content of this annex is copyright protected by the Organizational Partners
5 of the Third Generation Partnership Project (3GPP). Currently, the
6 Organizational Partners of 3GPP are in the process of granting 3GPP2
7 permission to reproduce and use 3GPP text in 3GPP2 specifications and reports.
8 Once this permission has been granted the current content of this Annex will be
9 replaced with the original content, in a fashion consistent with the agreement
10 made by each Partnership Project’s Organizational Partners.
