driving convergence worldwide

**Date:** 11 June 2009  
**To:** 3GPP SA5  
**From:** Prof. Simon Saunders  
Chairman, Femto Forum  
[simon@femtoforum.org](mailto:simon@femtoforum.org)  
**Re.:** HeNB Management

This contribution has been prepared by the following members of the Femto Forum, a 3GPP Market Representation Partner:

Vodafone, AT&T, Rogers Wireless, Orange/FT, NTT DoCoMo, Telecom Italia, T-Mobile, SFR, Telus, SK Telecom, SoftBank Mobile, China Mobile.

In the 9th Femto Forum Plenary (26 – 29 May 2009), it was discussed in the Operator Meeting whether HeNB management should use a different mechanism from what has been standardised for HNBs.

The co-sourcing operator members of the Femto Forum came to the conclusion that the mechanism that has already been standardised to manage HNB, i.e. TR-069, should be re-used for the management of HeNBs.

The co-sourcing operator members strongly recommend 3GPP SA5 to consider applying the standardised management mechanism for HNB to HeNBs.

Yours Sincerely,

Prof. Simon Saunders,  
Chairman  
Femto Forum
