TSG GERAN thanks T3 for the information regarding their ongoing work to upgrade 11.10-4 based upon the R99 revision of the core specification. TSG GERAN welcomes this initiative.

TSG GERAN is responsible for all conformance test specifications for all MS in the GSM/EDGE Radio Access Network. This is to ensure the network integrity. TSG GERAN is not fully familiar with all features in the newer revisions of the SIM toolkit specification. TSG GERAN would therefore welcome a representative from the T3 SIM toolkit ad-hoc test specification group to present the new tests to TSG GERAN WG5. If after this presentation we can agree that the SIM toolkit does not make it possible to change the MS behaviour in the network, then TSG GERAN is willing to consider the transfer of the responsibility for 11.10-4 from TSG GERAN to TSG T.

Dates of next planned TSG GERAN meetings:

4 - 8 February 2002
15 - 19 April 2002
24 - 28 June 2002
26 - 30 August 2002
18 - 22 November 2002
