1. Overall Description:

This LS is a response to the LS on relation of Subscription management and GUP.

Attention is called to other LS's from T2 which focus on specific topics within the overall topic of GUP work. T2-020115 presents a request for ACTION on the topic of overall GUP-related work coordination among various WG's. T2-020255 focuses on GUP/DDF timescales. T2-020254 focuses on coordination of data definitions, identified in GUP development.

T2 has reviewed the subject LS and the attached TS32.140. This LS is in Response to the SA5 LS S5-020028 (T2-020243) on the above subject.

T2 is of the view that there is a need to define the Requirements for Subscription Management more specifically than appear in TR32.140. Additionally, it would be beneficial to undertake the exercise to prioritise and phase the Requirements. The initial phase could be comprised of the set of essential minimal requirements which could then be realised in a more expeditious manner. T2 would like to propose that SA5 and SA1 define these more clearly than they currently appear in 32.140, which does not yet attempt to separate the higher priority Essential-Minimal Requirements from Additional Requirements.

T2 also perceives a need to Coordinate the task of clearly defining the Requirements for GUP and areas which may have some overlap with it, such as Subscription Management. T2 would like to suggest that SA1 is the right WG to undertake the task to ensure that Requirements are Co-ordinated across WG's and that they clearly define the Minimum Requirements which are separated from Additional Requirements. Attention is called to T2-020115 for more details on this area.

2. Actions:

To SA5, SA1 group.

ACTION: To SA5 group

T2 asks SA5 to kindly consider defining the Requirements for Subscription Management in a phased manner, with Essential minimal requirements in the first phase, and keeping them separate from Additional Requirements.

To SA1 group

T2 asks SA1 to kindly consider the Coordination of Requirements for GUP-related activities between WG's and to generate a set of prioritized Co-ordinated Requirements for items such as GUP and related areas with some overlap such as Subscription Management.

3. Date of Next T2 Meetings:

T2#17	13-17 May 2002	tbd
T2#18	19-23 Aug 2002	tbd
