**Title: Updating the IPR Register**

**Agenda item: 3.1**

**Document for:**

Decision	
Discussion	<b>X</b>
Information	

## **1 Introduction**

PCG#4 decided that the IPR Register required under Article 55 of the 3GPP Working Procedures should be created by establishing links from the 3GPP website to IPR declaration lists contained on the web sites of 3GPP Partners.

An area has now been created on the 3GPP web site specifically devoted to IPR declarations and active links are given to the IPR declaration lists of ETSI and TTC. There is a placeholder for links to the remaining partners but at present these links are conspicuous by their absence.

## **2 Action required**

ARIB, CWTS, T1, and TTA, are urged to provide links to their IPR declarations so that the IPR Register can be completed.

[Note: from looking at the 3GPP web statistics it is clear that the IPR web pages attract significant interest.]
