

3GPP TSG-N Meeting#2

Tdoc 3GPP NP-99025

**Fort Lauderdale, USA
1-4 March 1999**

Source : TSG-N WG2 Conviners

Title: Scope of 3GPP TSG-CN WG2 Work

The scope of CN-WG2 is primarily inherited from SMG3 WP'C', which covers the following work items:

- Maintenance of the Basic Call stage 2 specification;
- Maintenance and evolution of the CAMEL phase 2 stage 2 and 3 specifications;
- Exceptionally maintenance of CAMEL phase 1 stage 2 and 3 specifications
- Development of the CAMEL phase 3 stage 2 and 3 specifications;
 - Maintenance and enhancement of the GPRS Tunnelling Protocol specification;
 - Maintenance and enhancement of the MAP protocol specification;
 - Maintenance of the Mobile Number Portability specifications;
- Maintenance of the Subscriber Data Management stage 2 specification;
- Maintenance of supplementary services for earlier GSM releases;
 - Development of a Network Reference Model for the 3rd Generation Core Network.

WG2 is expected also to inherit the development of GSM Release '99 supplementary services from SMG3 WP'B':

- Multiple Subscriber Profile, phase 2;
- Follow Me;
- USSD enhancements;
- CNAP.

In addition, WG2 is expected to study jointly with TSG-CN WG1:

-definition of the interworking with access signalling protocols for CM & MM
