**Response to TSG\_T Liaison on**  
**Service Development Process**

**To**               **TSG\_T (T1/ T2/ T3**

**Document for: Information**

---

TSG\_CN received and treated on their recent meeting the LS from TSG\_T on the Service Development Process.

This LS touches several issues where TSG\_CN want to respond to two of them.

#### **Development Process**

TSG\_CN wants to clarify that all TSG\_CN groups are committed to the general development process that:  
Stage1 requirements are produced / elaborated by TSG\_SA1 and SA3

Stage2 issues (at least the principles) are fixed by TSG\_SA2

... and “after” this the TSG\_CN groups do their part of the job to complete all core network related parts of a given “work-item”.

#### **PICS**

In the section on Specification Structure the expectation is expressed to produce for test purposes PICS (Protocol Implementation Conformance Statements).

TSG\_CN wants to clarify that we have – for various reasons - no intentions to produce PICS documents for UMTS within the core network protocol.
