Title: Work Items of PDP Types PPP and OSP

In the last SMG#28 the CR's submitted by SMG4 pertaining to the release '98 work items of PDP types PPP and OSP were subsequently withdrawn since the required partner CR's were not submitted to SMG#28 by SMG3.

The necessary partner CR's were created by SMG4 and submitted to SMG3 before SMG#28. This was done so that SMG4 had completed the release '98 work items before handing over to SMG3 the GPRS interworking specifications of 07.60 and 09.61, as had previously been agreed. These partner CR's cover the stage 2 description (03.60) for OSP and codepoints (04.08 and 09.60) for both PPP and OSP:IHOSS.

SMG4 would kindly request that SMG3 endeavour to complete the partner CR's so these work items can be submitted to SMG#29.
