5.2 MO call

5.2.1 Functional requirements of serving MSC

Figure 8: Procedure Check_OG_Multicall_MSC.

This procedure is called when the MSC receives a Setup message from the MS. After handover procedure completion to another MSC, N_{br_SN} as defined for the target MSC shall overwrite the previous N_{br_SN} .

6 Interaction with telecommunication services

6.1 Speech

The Multicall supplementary service does not provide multiple traffic channels for speech calls. Refer to Procedure Check_OG_Multicall_MSC and Procedure Check_MT_Multicall_MSC.

If N_{br_UE} is greater than N_{br_SN} , the mobile station may initiate an Emergency call even if N_{br_SN} has been reached. When the network receives an Emergency call setup message from the mobile station:

- if N_{br_SN} has not been reached, the network shall accept it regardless of N_{br_SB} or N_{br_User} ;
- if N_{br_SN} has been reached, the network shall reject the emergency call setup attempt accept the emergency call after tearing down all other active calls. The MS shall release one or more existing calls and it shall re-initiate an Emergency call.

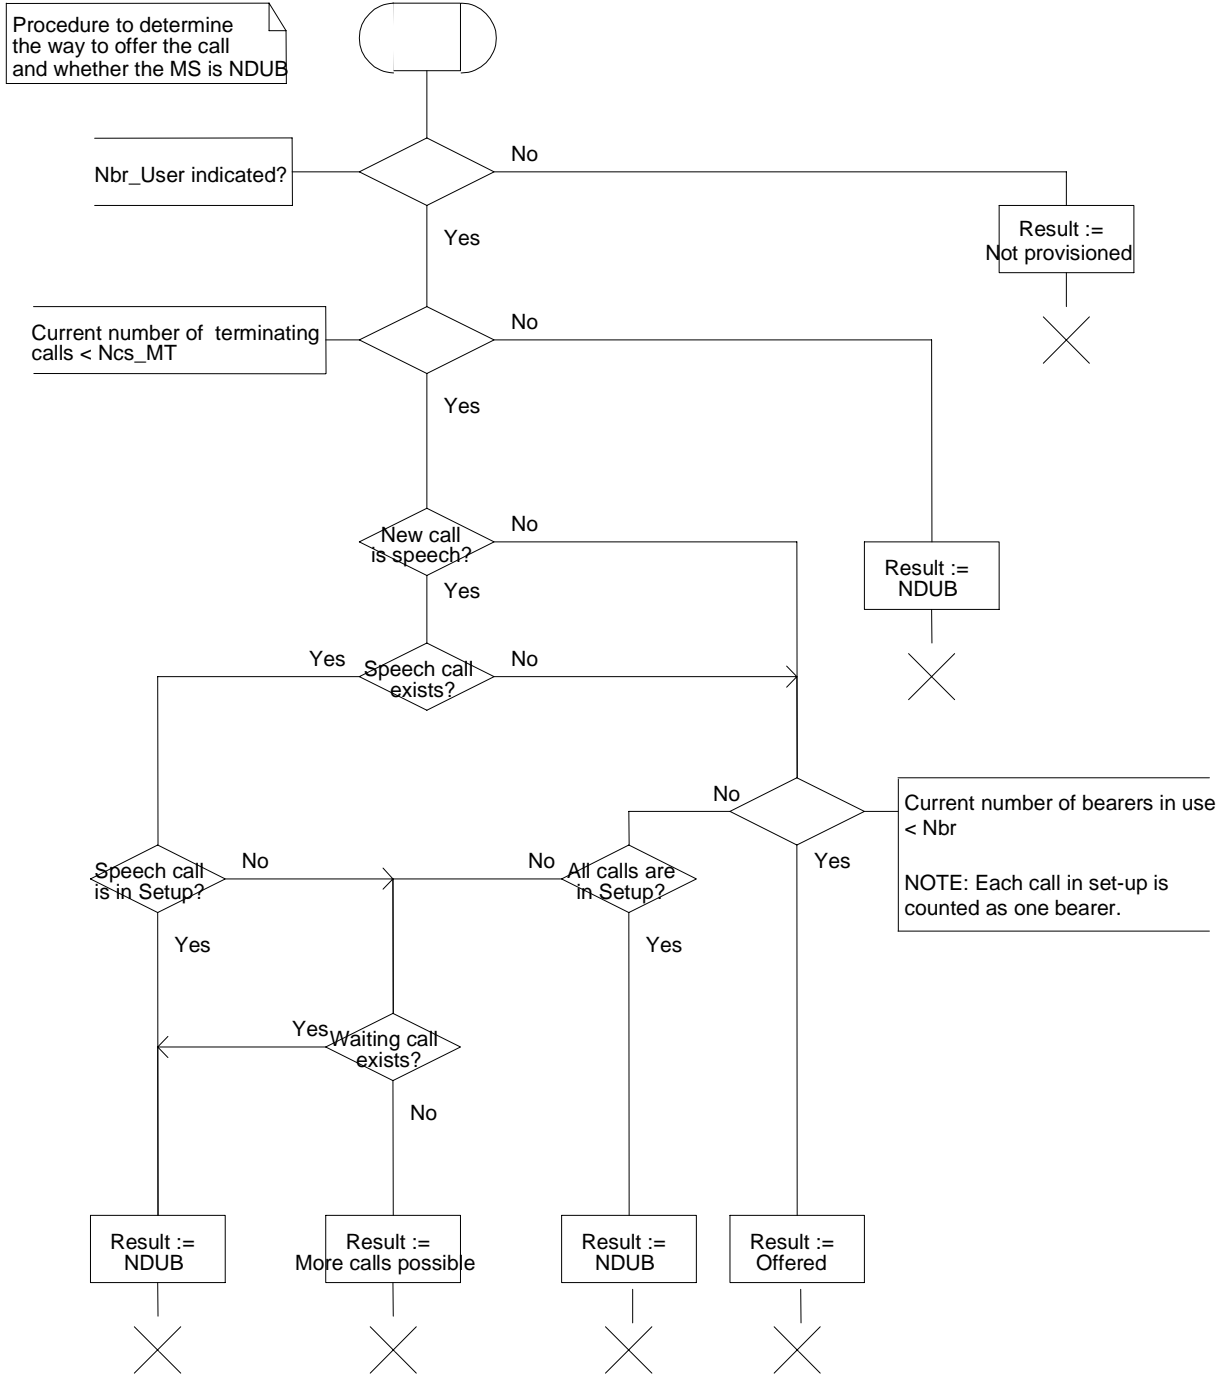

The MS shall ensure that an emergency call setup request is acceptable to a serving network which does not support multicall, if necessary by releasing one or more existing calls.
