1. Overall Description:

The contributing company for the CAMEL phase 4 functionalities *Charging Notification and Enhancements of dialled services* has not been able to provide delegates in order to make progress. There was no delegate from the contributing company in the CN2#21 or CN2#20 meetings. Thus, there has not been any progress on these functionalities lately. None of the CN#14 companies indicated interest in contributing on these functionalities.

Since the January meeting CN2#22 is the last meeting before March 2002 CN plenary, it is very unlikely that these features can be completed in Rel-5 time frame. Neither of the functionalities in question is trivial.

CN2#21 recommended removal of these functionalities from the Rel-5 specifications.

CN#14 agrees the CN2#21 proposal.

2. Actions:

ACTION 1 to SA1: To consider the proposal. If agreed, to remove these functionalities from Rel-5 22.078
CN2#22 may send an endorsed CR against the 22.078 specification, or an individual company may send a direct CR to next regular SA1 meeting (in February 2002).

ACTION 2 to SA1: It is currently a CN & CN2 working assumption that these features are not part of Rel-5 CAMEL phase 4. Please indicate to CN2 whether the proposal is agreed (positive or negative response).

ACTION to SA: To take a note of this.

3. Date of Next CN2 Meetings:

CN2#22	28 Jan – Feb 12002	Sophia Antipolis
CN2#23	8 – 12 Apr 2002	Tbd
