1. Overall Description:

CN5 have been informed by SA1 that further work is required to define how the User Data Management Function is implemented in the network. As a result, SA1 requested SA2 to review the requirements and to introduce the User Data Management Service Capability Feature (SCF) in TS 23.127.
CN5 would like to inform SA2 that CN5 are not able to progress the definition of the Stage 3 enhancements for this new Release 6 capability until the requirements are completed.

2. Actions:

To SA2 group.

ACTION: CN5 asks SA2 to take note that CN5 cannot work on the requirement for User Data Management until SA2 provide guidance on the architectural impacts of this new feature plus the relevant updates to 23.127. CN5 encourage SA2 to make progress on this issue.

To TSG-CN

ACTION: CN5 invites CN to note that until the architectural implications of this OSA Rel-6 requirement are clarified, CN5 will not be able to complete the work on Stage 3 OSA Rel-6. This may result in the User Data Management Function being removed from Release 6.

3. Date of Next CN5 Meetings:

Meeting	Date	Location	Host
#24	14-18 July 03	San Francisco	3GPP2
#25	Autumn '03	TBD	TBD
