Title: CR: EXPORT data types to CAP (Change of position armed with criteria)

Agenda item: 9.22

Document for: Approval

This document contains 1 CR on Rel-6 WI TEI\_6. This document is a company input to CN#22 for approval. Siemens AG kindly requests CN#22 to treat this document and approve it.

Title	Spec	CR	Rev	Cat	Rel	C_Ve
EXPORT data types to CAP (Change of position armed with	29.00	704		В	Rel-6	6.2.0
criteria)	2					

## From Reason for Change

CR 23.078-645r1 (N2-030587) and CR 29.078-585r1 (N2-030585) to realise to arm the handover DPs with criteria were approved by CN2#31 in Bangkok to be sent to CN#22 Plenary for the final approval to be included in the Rel-6 specifications.

In the CR 29.078-585r1, CellGlobalIdOrServiceAreaIdFixedLength and LAIFixedLength are used to realise for CAP\_RequestReportBCSMEvent to arm the DPs with criteria.

After the approval by CN2, however, it was found that these datatypes which had been defined in 29.002 and had been assumed to be exported were NOT exported.

This CR is submitted to complete the CR package set, "TEI\_6: Change of Position Armed with Criteria".

The author distributed the CR to the CN2 and the CN4 mailing lists on 07 November for comments or objection. To date of the formal submission, 02 December 2003, any comments or objection have not been received.
