### 1. Overall Description:

TSG-CN#27 has approved the attached Rel-6 CR#957 to 24.008 on "Modification of MS Behaviour under GPRS Attach and Routing Area Update with Reject Cause #14" based on the Liaison Statement from SA1 to CN1 on GPRS network selection (S1-040999, N1-041771) and specifically to address the scenario identified by SA1 in that liaison *Where there is no preferred network set in the PLMN list*. The CR allows a GPRS MS operating in MS operation mode A or B to optionally perform a PLMN selection if a GPRS Attach or Routing Area Update results in Reject Cause #14.

The CR also specifies under what circumstances this optional PLMN selection is allowed to be performed and specifically states that the MS shall not perform the optional PLMN selection in the case where the PLMN providing this reject cause is on either of the "User Controlled PLMN Selector with Access Technology" or "Operator Controlled PLMN Selector with Access Technology" lists or, a PLMN identified as equivalent to any PLMN, with the same MCC, contained in the mentioned lists.
