

**CANDIDATE FOR THE POSITION OF 3GPP TSG CN WG 1 VICE
CHAIRMAN**

Dear Sirs,

Ericsson is pleased to nominate Mr. Mark FENTON (Ericsson) for the position as vice-chairman of the 3GPP TSG CN Working Group 1 (MM/CC/SM).

Mark graduated from University of Nottingham with an 2/1 honours B.Eng. degree in Electrical and Electronic engineering in 1988. He has since gone on to become a full member of the IEE and is a chartered engineer.

From 1988 to 1990 Mark worked for Racal Defence Electronics (Radar) on the software development of ESM and ECCM systems for military naval use.

From 1990 to 1993 Mark worked for NEC (UK) Ltd as a software engineer. The company developed GSM (and DCS 1800) mobile terminals. Mark took responsibility for the development of the SIM-ME interface, which included participation in the ETSI SIM Expert Group (now called SMG 9).

Since 1993 Mark has worked for the company now called Ericsson Mobile Communications (UK) Ltd. developing GSM mobile terminals. Mark has focussed on the layer 3 signalling protocol and early in 1996 became the leader of signalling software development team in Basingstoke.

Mark has become increasingly involved in ETSI standardisation, starting with SMG 3 WP B meetings early in 1996 continuing to the end of 1997. Mark has attended SMG 3 WP A since October 1996 through to the present day.

Mark has been working on GSM terminal development for over 8 years. He has experience of the complete lifecycle of software development, from initial analysis and design through to coding and testing.

Ericsson is willing to offer the support and the resources necessary for Mark FENTON to pursue the 3GPP TSG CN WG 1 activities successfully.

Yours sincerely,

ERICSSON RADIO SYSTEMS AB
WCDMA Systems

Jonas Sundborg
Total Standardization Project Manager
