Subject: Nomination of candidate for the 3GPP TSG Core Network Chairman/Vice Chairman

Dear Mr. Rosenbrock,

Siemens is pleased to nominate Mr. Harald Dettner as a candidate for the Chairmanship of the 3GPP TSG CN. We believe that it is very important to ensure the close relation of the GSM and the UMTS core network. Therefore Harald Dettner as the current chairman of SMG3 is the ideal candidate to ensure this relation.

He will also be available for the position of Vice Chairman

Please find hereafter his curriculum vitae.

Harald studied Mathematics, Geography and Computer Science at the university of Marburg, Germany until 1982. He worked as a teacher until 1985, when he joined Siemens Mobile Networks. For the next two years, he did Software Development for the German analog cellular system C450.

In 1987 he started Research and Development activities in the maintenance domain for SS7 and GSM as well as the Siemens EWSD/D900 product.

Since 1992 he participates in the standardization activities in SMG, especially SMG3 WP-A, WP-C and SMG12. He is responsible for these standardization activities in Siemens.

In January 1997, he was elected as vice chairman of SMG3 and in June 1998 as chairman of SMG3.

During the SMG voluntary funding discussions he was an active member in the respective ad-hoc group and has got interesting insights in a very different but important area of standardisation.

Harald is the SMG contact partner for network standardization issues for the Japanese standardization body TTC.

Yours faithfully,

Dirk Weiler
