Title: Proposed Liaison statement to S1 on CAMEL functions to be included in Release 2000

Agenda item: 6.1.1

Document for: Approval

At their plenary meeting #6, December 1999, TSG-CN accepted that it would not be possible to complete the specification work on all the functions originally defined in TS 22.078 for CAMEL phase 3, in time for approval at TSG-CN plenary meeting #7. TSG-N2 indicated in a liaison statement (Tdoc N2-99K70) to S1 the functions which it was proposed to study for Release 2000. For convenience, this list is repeated below.

- MO calls: Mid call procedure (22.078 section 5.7).
- MO/MF calls: Creation of call parties – Call Party Handling (22.078 section 5.10).
- MT calls: Mid Call procedure (22.078 section 6.7).
- CSE Initiated call setup (22.078 section 8).
- Procedures for USSD (22.078 section 11).
- User Interaction scripts (section 14.4).
- Enhancements to CSE control of call duration – playing of tones (22.078 section 15.4).
- Enhancements to Call Forwarding interactions (22.078 sections 18.3.1, 18.3.2).
- Interactions with Optimal Routeing (22.078 section 20)

TSG-CN understand that S1 intend to discuss the scope of CAMEL phase 4 at their next meeting in Beijing; S1 are asked to consider the list above, and indicate which items they wish N2 to develop as part of the CAMEL phase 4 specification.
