Title: MERGED WG STATUS REPORT FOR WI R'99 CAMEL PHASE 2
Agenda item: 6.1
Document for: INFORMATION

Excerpts from N2 Status Report (NP-000235)

2 CAMEL Phase 2

A few proposals have been presented and approved in Rotenburg meeting to improve CAMEL phase 2.

- A Siemens proposal was agreed to improve stage 2 SDLs regarding to the Call Forwarding. In the SDLs the MSC-SCP relationship was hanging in some special cases.
- The encoding of * and # was clarified when the SCP collects user response using DTMF. * and # are seen vital for user interaction, thus they must be supported. The approved set of T-Mobil's CRs (stage 2 and 3) ensures inter-vendor operability.
- Usage of Announcement Suppression Indicator handling was corrected by Siemens CRs. This correction enables hunting services to operate in a more reliable way.
