3GPP TSG CN Plenary Meeting #10, Bangkok, Thailand 6<sup>th</sup> – 8<sup>th</sup> December 2000

# 3GPP TSG-CN1 Meeting #14 Cardiff, Wales - 20 - 24 November, 2000

Tdoc N1-001302

Agenda Item: 7.2

WI / Topic: Emergency Call Enhancements

Source: Ericsson

Title: CS based Emergency Call in Rel-4

Effected Specifications / Releases: Rel-4

**Document for:** Approval

**Date:** 14/Nov/2000

### **Work Item Description**

Title: CS based Emergency Call Enhancements in Rel-4

#### 1 3GPP Work Area

	Radio Access
X	Core Network
X	Services

### 2 Linked work items

\_

#### 3 Justification

It shall be possible to establish an emergency speech call to the serving network. Emergency calls will be routed to the emergency services in accordance with national regulations. This may be based upon one or more default numbers stored in the ME and/or USIM. It shall be allowed to establish an emergency call without the need to dial a dedicated number to avoid the mis-connection in roaming case, such as menu, or a linkage to a car air bag control. This functionality shall be supported by the UE without a SIM/USIM being present. No other type than Emergency calls shall be accepted without a SIM/USIM.

It shall be possible for the called emergency instance to recall the emergency caller, if the call is interrupted. However, loss of radio contact is out of scope of this requirement. This functionality shall be supported with and without an USIM being present in the UE.

### 4 Objective

The objective of this WI is to study the functionalities required on the protocol level to meet the requirements as defined in TS 22.101, TS 22.976 and other relevant specifications.

3GPP TSG CN Plenary Meeting #10, Bangkok, Thailand 6<sup>th</sup> – 8<sup>th</sup> December 2000

# 3GPP TSG-CN1 Meeting #14 Cardiff, Wales - 20 - 24 November, 2000

Tdoc N1-001302

### 5 Service Aspects

As defined in TS 22.101, TS 22.976 and other relevant specifications to include but not limited to:

- Using the existing emergency numbering schemes
- Compliant with FCC mandates, European and other regulatory requirements
- Possibility to initiate emergency calls to different emergency call centers, depending on the type of emergency
- Possibility to call back the emergency caller, if the emergency call dropped a loss of radio contact shall not be considered
- The functions shall be supported, when roaming

### 6 MMI-Aspects

As defined in TS 22.101, TS 22.976 and other relevant specifications, it shall be possible to implement different MMIs to invoke emergency services. This can be for example the dialled number, a dedicated Menu, one or more dedicated buttons, etc.

### 7 Charging Aspects

None.

In accordance to 22.101 and 22.976, no impacts on charging are foreseen.

## 8 Security Aspects

None.

In accordance to 33.102, no impacts on charging are foreseen.
