1. Overall Description:

SA2 kindly thanks CN1 for their Liaison Statement on “Interworking with non-IMS SIP UEs (precondition fallback)”.

Answering to CN1’s question, SA2 would like to confirm that CN1’s CR in N1-041096 (CR#644rev3 on 24.229) is in full alignment with stage-2 specifications, and hence would like to encourage its approval.

Additionally, SA2 would like to point out that it is conducting some investigations around the usage of Service Based Local Policy for certain services (e.g. Session Based Messaging, PoC) and session scenarios. Once these investigations have concluded, SA2 will inform CN1 and CN3 about possible impacts (including possible impacts on interworking with non-IMS UEs).

2. Actions:

None.
