## **1. Executive Summary**

TSAG restructuring discussions still ongoing in ITU-T. No decision yet on whether SSG will continue and if not which organization will pick up duties such as the production of Q.1741.x. Some companies favour rolling SSG work into the larger NGN effort.

Work on Q.1741.4 (referencing Rel 6) started. See NP-040176.

No further SSG work proposed on harmonization and interworking of IMT-2000 family members. Work on vision, mobility management, Q.1741, handbook, and FMC (Fixed Mobile Convergence) planned to continue. No more SSG meetings planned for this study period.

New service framework recommendation submitted for AAP (Alternative Approval Process) approval.

ITU-T NGN Focus Group created. First meeting is June 23-25, 2004. The precise role of the focus group remains to be seen.
