| 1.     | Opening of the Meeting  | 4  |
|--------|---|----|
| 2      | Approval of the agenda  | 4  |
| 3      | Registration of documents   | 4  |
| 4      | Reports   | 5  |
| 4.1    | Report of last CN3 Meeting  | 5  |
| 4.2    | Reports from last CN  | 5  |
| 4.3    | Reports of other groups   | 5  |
| 5      | IPR disclosures   | 6  |
| 6      | Items for immediate consideration   | 6  |
| 7      | Received Liaison Statements   | 7  |
| 8      | Release 4 and earlier   |    |
| 8.1    | GPRS [GPRS]   | 11 |
| 8.2    | Circuit switched Bearer Services [CS Data]  | 11 |
| 8.3    | Bearer Independent Circuit switched Core network [CSSPLIT]                                  | 12 |
| 8.4    | Technical Enhancements & Improvements [TEI]   | 12 |
| 9      | Release 5   | 13 |
| 9.1    | e2e QoS for IM Subsystem [E2EQoS]   | 13 |
| 9.2    | Service change and UDI fall back [SCUDIF]   | 14 |
| 9.3    | Technical Enhancements & Improvements [TEI5]  | 17 |
| 10     | Release 6   | 17 |
| 10.1   | Interworking between IM subsystem and IP [IW-CCR-IWIP]                                      | 17 |
| 10.2   | Interworking between IM Subsystem with CS [IW-CCR-IWCS]                                     | 17 |
| 10.3   | Media Gateway Control Function (MGCF) - IM Media Gateway (IMS-MGW) Mn Interface [IW-CCR-Mn] | 17 |
| 10.4   | Gq interface for Dynamic Policy control enhancements [QoS1]                                 | 18 |
| 10.5   | Support of Presence Capability [PRESENC]  | 19 |
| 10.6   | Multimedia Broadcast and Multicast Service [MBMS]   | 19 |
| 10.7   | WLAN – UMTS Interworking [WLAN]   | 22 |
| 10.8   | Gx Interface [CH-FBC]   | 22 |
| 10.9 R | x Interface [CH-FBC]  | 24 |
| 10.10  | Technical Enhancements & Improvements [TEI6]  | 29 |
| 10.11  | Circuit Switched Bearer Services [CS Data]  | 29 |
| 10.12  | Other Rel-6 Work Items  | 29 |
| 11     | Release 7   |    |
| 11.1   | Diameter for Gi interface [DIAMGi]  | 29 |
| 11.2   | Diameter for Wi interface [DIAMWi]  | 29 |
| 11.3   | Emergency Call Enhancements for IP& PS Based Calls [EMC1]                                   | 29 |
| 11.4   | Protocol impact from providing IMS services via fixed broadband [FBI]                       |    |

Page 3 of 51

# 1. Opening of the Meeting

The CN3 Chairman Mr. Ragnar Huslende opened the meeting at 09:00 on Monday and welcomed the CN3 delegates to Sydney on behalf of the hosts. Mr Toshiyuki Tamura gave some infomation about the meeting arrangement and Mr Ragnar Huslende invited all participants to social event hosted by Ericsson Australia.

# 2 Approval of the agenda

Page 4 of 51

#### 4 Reports

#### 4.1 Report of last CN3 Meeting

#### N3-050009: CN3#34 Draft Meeting Report, MCC.

**CONTENT:** Contains the draft meeting report for the CN3#34.

The report was completed and distributed at the end of the meeting. There was the usual 2-week deadline for comments by e-mail. These comments have been integrated in the revised meeting report presented in this document.

**RESULT:** The document was **APPROVED**.

#### 4.2 Reports from last CN

#### N3-050013: Brief notes from CN#26 relevant for CN3, CN3 Chairman.

**CONTENT:** Contains brief notes about the results of the CN#26 plenary related to CN3 matters.

- **DISCUSSION:** All CN3 input was approved with no technical changes although some correct CRs were produced for formation. The chairman reported from the decision of joint CN and T meeting held in Athen on creation of new TSG CT group. The chairman made some comments on the future scope of CN3.
- **RESULT:** The document was **NOTED**.

#### N3-050014: Hilites of CN#26/SA#26, CN3 Chairman.

- **CONTENT:** Contains overview of CN#26
- **DISCUSSION:** The document was distributed by email after the CN#26 meeting.
- **RESULT:** The document was **NOTED**.

#### 4.3 Reports of other groups

No documents for this agenda item

Page 5 of 51

#### 5 IPR disclosures

#### **Reminder for IPR declaration**

The chairman made the following call for IPRs, and asked ETSI members to check the latest version of ETSI's policy available on the web server:

The attention of the delegates to the meeting of this Technical Specification Group was drawn to the fact that 3GPP Individual Members have the obligation under the IPR Policies of their respective Organizational Partners to inform their respective Organizational Partners of Essential IPRs they become aware of.
The delegates were asked to take note that they were thereby invited:
to investigate whether their organization or any other organization owns IPRs which were, or were likely to become Essential in respect of the work of 3GPP.
to notify their respective Organizational Partners of all potential IPRs, e.g., for ETSI, by means of the IPR Statement and the Licensing declaration forms (http://webapp.etsi.org/lpr/).

#### 6 Items for immediate consideration

N3-050040LS on Allocation of 3GPP specific AVP numbers and Experimental Result codes<br/>for Gx, Nokia.<br/>CN3 has allocated the CN4 granted 3GPP specific AVP numbers to the Gx interface<br/>defined in TS 29.210DISCUSSION:CN3 will send an LS to CN4 during CN3#35 meetings. It was proposed to change<br/>"TSG-CN3" to "CN3".RESULT:The document was REVISED to N3-050135.↓ REVISED ↓LS on Allocation of 3GPP specific AVP numbers and Experimental Result codes<br/>for Gx, Nokia.

**RESULT:** The document was **APPROVED**.

(For contributions to this agenda item, please contact chairman in advance of meeting)

Page 6 of 51

| N3-050130   | aison Statements<br>LS on interactions between FBC and SBLP, TSG SA WG2.  |
|---|---|
| CONTENT:  | SA2 has discussed on interactions between FBC and SBLP and would like to inform CN3 how these interactions are to be specified in Release 6.  |
| RESULT:   | The document was <b>NOTED</b> .   |
| N3-050131<br>CONTENT:                                   | <b>LS on removal of Ry reference point, TSG SA WG2.</b><br>SA2 asks CN3 to analyse the implications from a CN3 point of view if any. In particular CN3 is guided to study whether the approval of the attached CR would lead to stage 3 implementation problems from a Release 6 point of view. SA2 would also like to inform CN3 that the release 7 PCC WI might develop the Ry reference point. |
| RESULT:   | The document was <b>NOTED</b> .   |
| N3-050177<br>CONTENT:                                   | <b>Reply LS on removal of Ry reference point, CN3.</b><br>CN3 has updated the scope of their stage 3 specifications TS 29.211 by removing the Ry reference point in accordance with the SA2 CR S2-050477 and suggests to TSG S. to approve the CR S2-050477.  |
| DISCUSSION:   | It was proposed to change "agree the CR" to "approve the CR" and CN3 will send an LS to SA, SA2 in N3-050193.   |
| RESULT:   | The document was REVISED to N3-050193.  |
| $\Downarrow \operatorname{\mathbf{Revised}} \Downarrow$ |   |
| N3-050193   | Reply LS on removal of Ry reference point, CN3.   |
| RESULT:   | The document was APPROVED.  |
| N3-050132<br>CONTENT:                                   | <b>LS on protection of Rx and Gx interfaces, TSG SA WG2.</b><br>SA2 asks SA3 and CN3 to update the relevant specifications to ensure that the Rx and Gx interfaces are adequately protected for Release 6.  |
| DISCUSSION:   | Nortel suggested offline discussions to progress the technical aspects during the meeting. It was questioned what would be required for Gx interface? It was suggested that we should make CRs for Gx interface. Rx security is covered by N3-050192 "Security in Rx". This LS was sent back to CN3 for further study on Gx in the next meeting.  |
| RESULT:   | The document was <b>NOTED</b> .   |
| N3-050023<br>CONTENT:                                   | LS on the Request of Gmb Diameter code values, TSG CN WG4.<br>CN4 would like to advise CN3 that the following data ranges have been allocated for th<br>Gmb Interface and corresponding codes and identifiers have been reserved in TS<br>29.230 as follows:  |
|   | 100 3GPP AVP command codes in the range:- 900 to 999  |
|   | <ul> <li>20 3GPP specific Experimental-Result-Codes of type Permanent failure range:-<br/>5120 to 5139</li> </ul>   |
| DISCUSSION:   | CN3 should wait till next meeting with sending further Gmb allocations in LS to CN4.  |
| RESULT:   | The document was <b>NOTED</b> .   |
| N3-050024<br>CONTENT:                                   | <b>Reply LS on MBMS Information Elements over lu interface, TSG CN WG4.</b><br>RAN3 asks CN1 and CN4 whether these IEs(IP Multicast Address and APN) have fixe length and where their coding is described.  |
| RESULT:   | The document was <b>NOTED</b> .   |
| N3-050026   | Reply on LS on GERAN Assumptions on common MBMS Information Elements, TSG CN WG2.   |
| RESULT:   | The document was WITHDRAWN.   |

| N3-050028             | Reply on LS on GERAN Assumptions on common MBMS Information Elements, TSG SA WG2.  |
|-----------------------|--|
| CONTENT:              | The SA2 understanding is that MBMS sessions may have durations in the range from a few seconds to many hours or days. An indicated session duration should also have a possible value indicating an 'indefinite' length.   |
| DISCUSSION:           | Some modification will be required to TS 29.061 Rel-6. Nortel will provide the CR for indefinite value. Related CR is contained in N3-050171.  |
| RESULT:               | The document was <b>NOTED</b> .  |
| N3-050027<br>CONTENT: | <b>Reply LS on MBMS Information Element coding, TSG SA WG2.</b><br>In this LS, SA2 discussed the questions about coding of the MBMS Session Duration IE raised by RAN3 and asks RAN3 to identify a suitable range for the encoded session duration.  |
| DISCUSSION:           | Reply LS in N3-050125  |
| RESULT:               | The document was <b>NOTED</b> .  |
| N3-050035<br>CONTENT: | Reply LS on MBMS Information Element coding, TSG SA WG2.<br>Replaced by N3-050126.   |
| RESULT:               | The document was WITHDRAWN.  |
|                       |  |
| N3-050126<br>CONTENT: | <b>Reply LS on MBMS Information Element coding (S2-043862), TSG GERAN.</b><br>GERAN provides SA2, RAN3 & CN3 with some comments and its current assumptions, aimed at achieving a common understanding and agreement in GERAN and UTRAN for the MBMS Session Duration, as envisaged by SA2.  |
| DISCUSSION:           | CN3 agreed not to change the specification because its description was covered by encoding Gmb   |
| RESULT:               | The document was <b>NOTED</b> .  |
| N3-050036             | LS on bit rate/delay requirements in the GERAN for an MBMS session, TSG GERAN WG2.   |
| CONTENT:              | GERAN2 strongly suggests to always associate the Streaming traffic class parameters<br>to any MBMS service type (e.g. Streaming or Download & Play), when the MBMS<br>service has to be provided over the GERAN. This conclusion is also supported by<br>GERAN2 assumption that the BM-SC may always define a precise bit rate requirement<br>also for a Download & Play service type, since it: |
|                       | <ul> <li>knows the rate at which the data flow will be distributed to the different network<br/>nodes.</li> </ul>  |
|                       | never indicates the session duration as a volume of data, but as a time indication   |
| RESULT:               | The document was <b>NOTED</b> .  |
| N3-050031<br>CONTENT: | LS on Session Repetition, TSG SA WG4.<br>In this LS, SA4 summarises the need for a tranmission session identifier and will include<br>a definition of transport session identifier format in TS 26.346.  |
| DISCUSSION:           | Reply LSs in N3-050133, N3-050125 and N3-050025.   |
| RESULT:               | The document was <b>NOTED</b> .  |
| N3-050133<br>CONTENT: | <b>Reply LS on Session Repetition, TSG SA WG2.</b><br>SA2 always considers a "MBMS session" used at bearer level as a "transmission<br>session" as defined in the LS. There is no concept of a user session in SA2.  |
| RESULT:               | The document was NOTED.  |

Page 8 of 51

#### N3-050037 LS on Session Repetition, TSG SA WG2.

**CONTENT:** Replaced by N3-050125.

**RESULT:** The document was **WITHDRAWN**.

#### N3-050125 Reply LS on Session Repetition (S4-040841), GERAN2.

**CONTENT:** This is a reply LS to incoming LS N3-050031. GERAN2 summarizes the following current assumptions:

- The Session Id is optional, but when included by the BM-SC it shall be delivered to the GERAN, which in turn shall deliver it to the mobile stations;
- The Session Id size is 1 byte;
- The Session Id validity timer, if needed, is defined and handled at the application layer (and not at radio level) and the value is delivered to the mobile station via application signalling, e.g. during the joining procedure;
- The MBMS SESSION START REQUEST message shall be delivered at the beginning of every session and shall include the Session Id, if available.
- **RESULT:** The document was **NOTED**.

#### N3-050025 Reply LS on Session Repetition, TSG RAN WG2.

- **CONTENT:** This is a reply LS to incoming LS N3-050031. RAN2 always considers a "session" used in UTRAN as a "transmission session" as defined in the LS. There is no concept of a user session in RAN2. In addition, a UE uses a session id to recognize the repetition of the transmission session in RAN2. Based on the session id, the UE will decide to whether to receive a specific repeated MBMS session or not. Regarding the size of a session id, one octet of a session id is used in RAN2 specifications. Since a session id is broadcast on the Uu interface, RAN2 has a preference for keeping the current assumption i.e. one octet of a session id. If SA4 considers changing the size of a session id, RAN2 would like to be informed.
- **RESULT:** The document was **NOTED**.

#### N3-050134 Response LS on MBMS session repetition, SA2.

- **CONTENT:** SA2 intends to produce the CRs to 23.246 changes in the next meeting and assumes that this Session repetition number would need to originate in the BM-SC. SA2 kindly requests SA4, CN3, CN4 to take into account the MBMS Session Repetition Number within their respective specifications
- **DISCUSSION:** It was commented that CN3 should check R2- 050298 LS and consult our SA2 colleagues. It was mentioned that we need to have parameters in Gmb. Companies need time to check implications on Gmb and impact on application layer. Related CR will be required to CN3's specifications. The required CR was postponed till next meeting.
- **RESULT:** The document was **NOTED**.
- N3-050129Reply to Liaison Statement on MBMS User Service architecture, SA2.CONTENT:SA2 passed a number of CRs on 23.246 at its November meeting which may have<br/>impact on 26.346. These were subsequently approved at the December SA plenary. In<br/>addition SA2 has approved one CR at this meeting relating to BM-SC functionality.
- **RESULT:** The document was **NOTED**.

#### N3-050029 LS on impacts of early IMS security mechanisms, SA3.

**CONTENT:** SA3 informs CN3 that the information within N3-040881 has been incorporated into section 6.2.1 of TR 33.878. SA3 also considered the information within N3-040882, but decided that it was not appropriate to include it in TR 33.878. In particular, SA3 would like to clarify to CN3 that it is not the intention of the early IMS security solution that the HSS should be able to send Radius Disconnect Requests to the GGSN. Therefore, it was decided not to include the corresponding specifications about Radius Disconnect Requests from N3-040882.

Page 9 of 51

SA3 has decided that full detail of the early IMS security solution should be contained in a single document, TR 33.878. Therefore, SA3 does not expect that any changes to TS 29.061 are required.

**RESULT:** The document was **NOTED**.

#### N3-050030 LS on impacts of early IMS security mechanisms, SA3.

- **CONTENT:** SA3 informs SA2 that all the points raised in the LS have been taken into consideration when creating TR 33.878v0.0.4, which SA3 has agreed to send to SA plenary for approval.
- **RESULT:** The document was **NOTED**.

#### N3-050032 Reply to TISPAN on Workshop on "IMS over Fixed Access", TSG SA.

- **CONTENT:** 3GPP requests the 3GPP TSG SA WG2 management to organise such a workshop in conjunction with ETSI TISPAN and 3GPP OPs and asks ETSI TISPAN endorse the workshop.
- **RESULT:** The document was **NOTED**.
- N3-050039 About the Workshop on "IMS over Fixed Access" (30-31 March 2005), ETSI TISPAN.
- **CONTENT:** TISPAN is pleased to endorse the Workshop on "IMS over Fixed Access" as proposed to be held on 30-31 March 2005 and to takes note of the considerations in liaison.
- **RESULT:** The document was **NOTED**.

#### N3-050038 LS on AoC and SCUDIF interaction, SA1.

- **CONTENT:** SA1 has identified a potential problem on the AoC and SCUDIF interaction which causes an inconsistency on charging information calculated by network and MS. It would take place with un-harmonized timings for charging information update within network and MS on SCUDIF modification.
- **RESULT:** The document was **NOTED**.

#### N3-050180 LS on completion of network initiated SCUDIF support, RAN3.

- **CONTENT:** RAN3 would like to clarify that in the proposal originally included in R3-041734, they have reused the coding of RAB QoS negotiation feature with a certain extension. The extension consists in allowing the signalling of a full set of RAB parameters as an alternative configuration for the RAB, containing the parameters for the less preferred service. Indeed, the existing Rel-4 negotiation parameters Alternative Guaranteed bit rate and Maximum bit rate were deemed as not sufficient for the purpose of SCUDIF function.
- **RESULT:** The document was **NOTED**.

#### N3-050224 LS on 3GPP Diameter allocations for Gx interface, CN4.

- **CONTENT:** This is a reply LS to N3-050135. CN4 has added 3GPP AVP-codes and Experimental-Result-Codes described in LS on Allocation of 3GPP specific AVP numbers and Experimental Result Codes for Gx interface (N3-050135, N4-050372) to 3GPP TS 29.230 with the exception of charging function address AVPs.
- **DISCUSSION:** A CR is needed to TS 29.210 for the next meeting to align with the code allocations from CN4.
- **RESULT:** The document was **NOTED**.

N3-050047 Dics.: Network Initiated SCUDIF in R6, Nortel, TIM, Orange, Nokia

Page 14 of 51

| CONTENTS:                         | It is proposed:<br>1. to agree on the proposal for the fallback video into speech scenario of network-<br>initiated Scudif in R6 described in the section 3 together with the service upgrade<br>speech into video.   |
|-----------------------------------|---|
|                                   | <ol> <li>to agree on the associated CR N3-050048 on TS23.172</li> <li>It is further proposed to liaise RAN3 that we have agreed a proposal which is in line with their proposed CR in tdoc R3-041734 that has been presented to RAN PI#26</li> <li>to liaise RAN about these CN3 conclusions.</li> </ol>  |
| DISCUSSION:                       | LM Ericsson objected to the proposal since the solution does not consider some major issues such as the break in speech when notifying the users of the possibility to upgrade to video. The full solution should be considered first before deciding what we can accept in Rel6. LS N3-050151 sent to RAN3.  |
| RESULT:                           | The document was <b>NOTED</b> .   |
| N3-050048                         | CR-23.172-Rel6: Correction to Network-initiated SCUDIF, Nortel, TIM, Orange,<br>Nokia   |
| CONTENTS:                         | A RANAP compliant solution is defined for network-initiated scudif.   |
| RESULT:                           | The document was REVISED to N3-050145.  |
| <b>↓ Revised</b>                  |   |
| N3-050145                         | CR-23.172-Rel6: Correction to Network-initiated SCUDIF, Nortel Networks, TIM,<br>Orange, Nokia, Siemens   |
| CONTENTS:                         | A RANAP compliant solution is defined for network-initiated scudif.   |
| DISCUSSION:                       | LM Ericsson requested the author to remove figures 4.14a and 4.14b  |
| RESULT:                           | The document was REVISED to N3-050149.  |
| $\Downarrow$ Revised $\Downarrow$ |   |
| N3-050149                         | CR-23.172-Rel6: Correction to Network-initiated SCUDIF, TIM, Orange, Nokia, Siemens   |
| DISCUSSION:                       | LM Ericsson proposed to delete some sentences of 4.2.5. because it is not clear for the requirment of SA1. It was conditionally agreed. There were no objection on downgrade case. Further study is needed on alternative solutions to clarify. Need to check whether we can delete figure or not.  |
| RESULT:                           | The document was REVISED to N3-050231.  |
| <b>↓ Revised ↓</b>                |   |
| N3-050231                         | CR-23.172-Rel6: Correction to Network-initiated SCUDIF, TIM, Orange, Nokia, Siemens   |
| RESULT:                           | The document was AGREED.  |
| N3-050096<br>CONTENTS:            | <b>Dics.: Support of Service Change in SCUDIF, Ericsson</b><br>The document specified service upgrade from <u>Speech to Muti-Media</u> and the<br>downgrade from <u>Multi-Media to Speech.</u> It is proposed that CN3, RAN and SA2<br>communicate to get a common understanding that these considerations are helpful to<br>achieve a substantially more user friendly behaviour.                        |
| DISCUSSION:                       | Siemens couldn't fully agreed on this matter. LM Ericsson argued that we need to agree<br>on stage 2 functional requirements before we can discuss and agree solutions. It was<br>agreed to present a CR to 23.172 (050147) adding some functional requirements for the<br>service upgrade. Proposed offline discussion. There were some debates on down<br>grading procedure. LS N3-050151 sent to RAN3. |
| RESULT:                           | The document was <b>NOTED</b> .   |
| N3-050115<br>RESULT:              | <b>CR-23.172-Rel6: Service Change at Loss and Recovery of Coverage, Siemens</b><br>The document was <b>WITHDRAWN</b> .  |
| N3-050122                         | Disc.: Service Change at Loss and Recovery of Coverage, Sony Ericsson   |
|                                   | Page 15 of 51   |
|                                   |   |

**RESULT:** The document was **WITHDRAWN**.

N3-050123Dics.: Service Change at Loss and Recovery of Coverage, SiemensCONTENTS:The contribution summarizes possible solutions and discusses their benefits and<br/>drawbacks. It identifies some open issues in the RAN 3 solution that require further<br/>study before a solution becomes acceptable.

**DISCUSSION:** There was some discussion regarding charging issues and functions.

- **RESULT:** The document was **NOTED**.
- N3-050012 Disc: SA1 LS on "LS on "Clarification of charging requirements for SCUDIF", Siemens
- **RESULT:** The document was **NOTED**.

#### N3-050146 LS on network-initiated SCUDIF support, Siemens.

- CONTENT: CN3 asks RAN 3 to approve CRs implementing only the part of their proposal for network-initiated SCUDIF support that relates to an alternate configuration with lower bandwidth requirements. Furthermore, CN3 asks RAN 3 to answer the following questions relating to notifications about the availability of radio resources for an alternate configuration with higher bandwidth demands.
  - Is it possible to provide such notifications via RANAP?
  - Is it possible to provide such notifications via RRC after a suitable configuration of the RAB via RANAP?
- DISCUSSION: RAN3 CRs need to be attached to LS. Need to send cc RAN plenary even if there is no action to RAN
- RESULT: The document was REVISED to N3-050150.

# N3-050210 Disc.: Stage 2 requirements for network initiated upgrade to multimedia and downgrade to speech, Nokia.

**CONTENT:** This document proposes *requirements for network initiated upgrade to multimedia and downgrade to speech*, to be inserted in TS 23.172. The document refers to the earlier presented document N3-050147.

Page 16 of 51

|     | DISCUSSION:           | Everyone agreed on the requirement of downgrade. Siemens objected to c) of 4.1.2. Nortel proposed email discussion on downgrade. before the next plenary. Compaies encrouaged to progress the work towards the next CN3 meeting, requirements and solutions level. |
|-----|-----------------------|--|
|     | RESULT:               | The document was <b>NOTED</b> .  |
|     | N3-050233<br>CONTENT: | <b>Rel-6 extention request for SCUDIF, Vodafone.</b><br>The aim of this document is to ask SA to grant CN3 with an exemption for the Service change and UDI fallback for Rel-6.  |
|     | DISCUSSION:           | It was asked to change the header of submission form and correct tdoc number correction.   |
|     | RESULT:               | The document was REVISED to N3-050236.   |
|     | <b>↓ Revised ↓</b>    |  |
|     | N3-050236             | Rel-6 extention request for SCUDIF, Vodafone.  |
|     | RESULT:               | The document was AGREED.   |

#### N3-050078 CONTENT: NGN Interworking of CS data Mobile Terminating calls from PSTN, Alcatel. The document proposed that a couple of change requests to resolve the interworking issue identified in the paper N3-040810 titled "Codec for modem and fax calls in the CS core". DISCUSSION: Siemens has a concern on media gateway based solution on this CR. It was commented that the proposal solution was not completed. Various solutions were

discussed but it was not agreed. Need to study further and contribution for the next meeting.

**RESULT:** The document was **NOTED**.

# 10 Release 6

## 10.1 Interworking between IM subsystem and IP [IW-CCR-IWIP]

No input to this agenda item.

## 10.2 Interworking between IM Subsystem with CS [IW-CCR-IWCS]

| N3-050072 | Corrections to AMR codec parameters, Lucent Technologies.                             |
|-----------|---|
| CONTENT:  | Changes have also being introduced to 28.062, 26.103 and 23.153 in SA4 and CN4 to     |
|           | correct the handling of UMTS_AMR in OoBTC and TFO to assure proper interworking.      |
|           | Both sets of changes must be reflected in the AMR parameter translation procedures in |
|           | 29.163.   |

RESULT: The document was REVISED to N3-050152.

## **↓ R**EVISED **↓**

| N3-050152   | Corrections to AMR codec parameters, Lucent Technologies.                                       |
|-------------|---|
| DISCUSSION: | Note3 was changed in the first table B.2.5.1. Comment from Nokia was applied to the revised CR. |
| RESULT:     | The document was AGREED.  |

#### 10.3 Media Gateway Control Function (MGCF) - IM Media Gateway (IMS-MGW) Mn Interface [IW-CCR-Mn]

No input to this agenda item.

| N3-050076<br>RESULT:                 | CR29.061-Rel6: Charging information for MBMS services., Vodafone.<br>The document was WITHDRAWN.   |
| N3-050077<br>CONTENT:                | <b>CR29.061-Rel6:</b> Tracing information for MBMS., Vodafone.<br>To enable BM-SC tracing the GGSN may optionally send trace information to the BM-SC over the Gmb interface. The tracing information coming from the SGSN in the Create MBMS Context Request is missing on the Gmb interface. This information is therefore added to the Gmb interface in the AAR message when the GGSN seeks authorization for the user. |
| DISCUSSION:                          | The document couldn't be agreed because there is no stage 2 requirement to perform the described functionality at BM-SC for MBMS services. Since SA can control the contents of release 7, it was suggested that an LS(N3-050205) with this CR should be sent to SA5 asking if it is possible to include the the requirement for tracing capability at the BM-SC level within the Rel-6.                                   |
| RESULT:                              | The document was WITHDRAWN.  |

| RESULT:                                  | The document was AGREED.  |
|  |   |
| N3-050044<br>CONTENT:                    | <b>CR29.210-Rel6: Complete the transient failures result codes, Nortel Networks.</b><br>New Transient Failures Result-Codes are defined, one for the Gx protocol, and one for the Gx over Gy protocol equivalent to the DCCA code 4011. Given that in TS 29.210 2 new applications-id are used for those protocols, the same result-code cannot be reused following IETF working practices. Therefore 2 new result-codes are define, one for each aplplication-id to mimic the code 4011. |
| DISCUSSION:                              | Siemens was not convinced this use case and didn't agree on the matter because that was no corresponding stage 2 requirement and considerable implementation complexity would be implied.   |
| RESULT:                                  | The document was <b>POSTPONED to the next meeting</b> .   |
|  |   |
| N3-050045                                | CR29.210-Rel6: Clarification on the use of the application-ids on   |
| CONTENT:                                 | <b>NOT_APPLICABLE notifications, Nortel Networks.</b><br>A clarification is added in the event of a (Gy) DCC_Not_Applicable happens in a Gx<br>Over Gy session.   |
| DISCUSSION:                              | Siemens didn't fully agree on this matter since there is no use case for terminating the Gx part of the application prior to the Gy part. This is related to the discussion of N3-050044.   |

# 11.4 Protocol impact from providing IMS services via fixed broadband [FBI]

- N3-050021 WID: Protocol impact from providing IMS services via fixed broadband, CN3 Chairman. CONTENT: The latest approved version of the WID on protocol impact from providing IMS serv
  - ONTENT: The latest approved version of the WID on protocol impact from providing IMS services via fixed broadband (NGN related WI). CN3 specifications TS29.209 and TS29.163 are on the list of affected specifications.

**RESULT:** The document was **NOTED**.

#### 11.5 Other Rel-7 Work Items

| N3-050065<br>CONTENT: | <b>Disc.: Handling of non-SDP bodies within SIP messages, Lucent Technologies.</b><br>This contribution seeks to clarify the handling of non-SDP message bodies within the IM CN subsystem.  |
|-----------------------|--|
| RESULT:               | The document was <b>NOTED</b> .  |
| N3-050066<br>CONTENT: | <b>Disc.: Treatment of 3xx responses by IMS, Lucent Technologies.</b><br>This contribution examines the issues involved in processing SIP 3xx responses, and seeks to identify if additional requirements need to be specified over and above those indicated in the IETF specifications which are already referenced. |
| RESULT:               | The document was <b>NOTED</b> .  |
| N3-050067<br>CONTENT: | <b>Disc.: Redirection and ISUP transparency, Lucent Technologies.</b><br>This contributions examines some use cases that have recently been endorsed as being part of current IMS by SA1, and examines the best manner of supporting those use cases.  |
| RESULT:               | The document was <b>NOTED</b> .  |
| N3-050068             | Disc.: Summary of ETSI TISPAN activities in support of interworking discussion documents, Lucent Technologies.   |
| CONTENT:              | This contribution is submitted to both 3GPP WG CN1 and 3GPP WG CN3 for discussion as to the appropriate way forward.   |
| RESULT:               | The document was <b>NOTED</b> .  |
| N3-050069<br>CONTENT: | <b>Disc.: IMS SIP profile for ISUP transparency, Lucent Technologies.</b><br>This contribution provides further analysis of the issues raised in a companion contribution to 3GPP WGs CN1 and CN3 (see N1-050069/N3-050067).   |
| RESULT:               | The document was <b>NOTED</b> .  |
| N3-050070             | Disc.: Policy control and charging rule provisioning over Go-Gx and Gq-Rx interfaces, Lucent Technologies.   |
| RESULT:               | The document was <b>NOTED</b> .  |
| N3-050071             | Disc.: Proposed QoS signaling flows for Go procedures over Diameter, Lucent Technologies.  |
| CONTENT:              | This contribution proposes call flows for the first step in the development of these combined interfaces – call flows for SBLP procedures using a Diameter interface between the GGSN and PDF.   |
| RESULT:               | The document was <b>NOTED</b> .  |

N3-050011 Meeting Calendar for 2005 / 2006, MCC.

Page 32 of 51

# 14 Summary of results

## 14.1 Work Items

No CN3 WIDs were created or revised during the meeting.

#### 14.2 Liaison Statements

The following LSs were approved by CN3, and will be presented to the next CN Plenary for INFO.

| Tdoc      | Title   | LS To   | LS Cc      | Attachment |
|-----------|---|---------|------------|------------|
|           | Allocation of 3GPP specific AVP numbers and Experimental Result codesfor Gx | CN4     |            |            |
|           | LS to RAN3 LS on completion of network initiated SCUDIF support             |         | RAN,<br>CN |            |
| N3-050193 | Reply LS on removal of Ry reference point                                   | SA, SA2 |            |            |
| N3-050205 | LS Out tracing information for MBMS services                                | SA      | SA5        |            |

#### 14.3 TRs / TSs

No TSs or TRs were AGREED by CN3, to be presented to the next CN Plenary.

| Tdoc      | Туре | Title   | Release | Source |
|-----------|------|---|---------|--------|
| N3-050237 | TS   | TS 23.211 v2.0.0 Rx protocol and Gx/Rx signalling flows | v2.0.0  |        |

# 14.4 Change Requests

The following CRs were AGREED by CN3, and will be presented to the next CN Plenary for APPROVAL.

| LIST_Report_List_Agreed_CRs |        |     |     |     |  |           |        |           |

| N3-<br>050225               | 29.061 | 145 | 2   | F   | Adding the MBMS session id to the Gmb Session Start message                     | Rel-<br>6 | 6.3.1 | MBMS             |
| N3-<br>050152               | 29.163 | 060 | 1   | F   | Corrections to AMR codec parameters   | Rel-<br>6 | 6.5.0 | IMS-CCR-<br>IWCS |
| N3-<br>050202               | 29.207 | 150 | 3   | F   | Clarification on charging identifier(s) exchange.                               | Rel-<br>6 | 6,2,0 | QoS1             |
| N3-<br>050144               | 29.208 | 095 | 1   | F   | Essential clarification of the Scope for call flows                             | Rel-<br>6 | 6.2.1 | E2EQOS           |
| N3-<br>050223               | 29.208 | 097 | 1   | F   | Change of port number   | Rel-<br>6 | 6.2.1 | E2EQOS           |
| N3-<br>050203               | 29.209 | 012 | 3   | F   | Clarification on charging identifier(s) exchange.                               | Rel-<br>6 | 6,1,0 | QoS1             |
| N3-<br>050218               | 29.209 | 013 | 3   | F   | Specific Action AVP update  | Rel-<br>6 | 6.1.0 | CH-FBC           |
| N3-<br>050053               | 29.209 | 011 |     | F   | Correction to Specific-Action AVP terminology                                   | Rel-<br>6 | 6.1.0 | QoS1             |
| N3-<br>050226               | 29.210 | 006 | 3   | F   | TFT filter clarifications   | Rel-<br>6 | 6.0.0 | CH-FBC           |
| N3-<br>050222               | 29.210 | 003 | 2   | F   | Clarification on the use of the application-ids on NOT_APPLICABLE notifications | Rel-<br>6 | 6.0.0 | CH-FBC           |
| N3-<br>050174               | 29.210 | 005 | 1   | F   | Clarifications for Indication of Bearer Termination                             | Rel-<br>6 | 6.0.0 | CH-FBC           |
| N3-<br>050219               | 29.210 | 001 | 3   | F   | Extend the Rule Name uniqueness to the whole system                             | Rel-<br>6 | 6.0.0 | CH-FBC           |
| N3-<br>050209               | 29.210 | 007 | 2   | F   | Correction of AF Definition   | Rel-<br>6 | 6,0,0 | CH-FBC           |
| N3-<br>050221               | 29.210 | 009 | 2   | F   | RAT Type AVP definition   | Rel-<br>6 | 6.0.0 | CH-FBC           |

# 14.5 Other

None.

Page 34 of 51

# 15 Any other business

# 16 Close of meeting

The CN3 Chairman closed the meeting and thanked the hosts for the excellent meeting location and arrangements.

He also thanked the CN3 delegates and the MCC support for their active participation in the meeting
