Release 6 Submission form

Feature / Item:		Adding Client Provisioning Application Characteristics to Rel-6 Version of TS 24.167 (IMS Managed Object)						
Affects:	**UE/MS: X**	**CN: X**	**UTRAN:**	**GERAN:**	**Compatibility Issues:**	**Yes:**	**No: X**	
Expected Completion Date:		09/2005						
Services impacted:		**IMS Managed Object**						
Specifications affected:		**TS 24.167**						
Tasks within work which are not complete:		**Client Provisioning Application Characteristics should be added**						
Consequences if not included in Release 6:		**IMS terminals can only be configured with OMA DM, but not with CP. CP is currently the most widely used device configuration mechanism. If not approved, IMS settings cannot be provisioned to a wide range of IMS terminals.**						
Accepted by TSG#		**for late inclusion in Release 6:**						

Abstract of document:

This document proposes to add Client Provisioning (CP) Application Characteristics (AC) to the Rel-6 Version of TS 24.167 (IMS Managed Object).

If CT1 agrees to add Client Provisioning to TS 24.167 for Rel-6, the following restrictions shall be applied:

- Client Provisioning shall only be used if either the network or the mobile or both do not support provisioning of the IMS MO via OMA-DM

- If a terminal gets IMS parameters provisioned from the same operator with CP and OMA-DM, the settings received via OMA-DM shall take precedence, i.e. the CP settings shall be disregarded.

Contentious Issues:
